SHANK

HOOK POINTS

Hand Ground

BKK Hand Ground technology enables the hook to reach unprecedented levels of penetration and lightness. This process leaves the original needle point unaltered as the grinding begins a few millimeters above the point.

- Hand ground sides form a sword blade for reduced piercing resistance.
- Lighter hook structure by grinding areas with minimal stress.
- Reinforced in critical areas to prevent bending out.

Cutting Delta

The design concepts of the Cutting Delta point originate from the formation of a military sword.

- Razor sharp tip with leading edges designed to reduce surface contact area.
- Cold forging enhances the penetration performance while strengthening the structure.

Cutting Blade

The patented design concept of the Cutting Blade was derived from the sharp teeth of a shark.

- Penetrate hard jawbone with ease by piercing through and sliding between the bony parts of a fish's mouth.
- Excels in long-range fishing techniques for bottom dwelling fish with bony mouths.

Combat Point

The design of the CP hook point resembles that of an inverted T, greatly increasing the penetration performance.

- Utilizing three edges helps aide in piercing through the hardest mouths.
- The central edge reinforces the structure and aids in its overall strength.
- Designed for long-lasting performance even after dealing with rocky bottom.

COATINGS

BKK HYPER CARBON STEEL

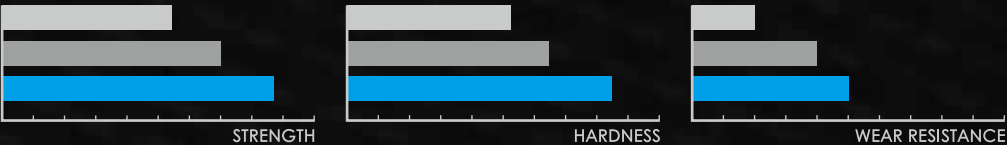

Years of fine-tuning custom steel formulas and testing the perfect temperatures and tempering times brings a best-in-class material that outperforms the rest.

TREBLES

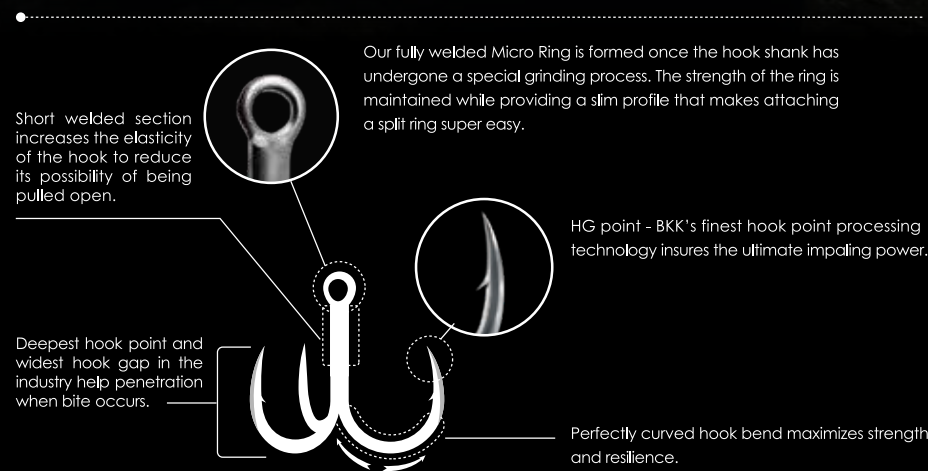

Crafted with uncompromising precision and built to help you land more fish from bass to bluefin tuna and everything in-between. BKK trebles offer unmatched strength, durability, and razor-sharp penetration, delivering a lethal combination of power and performance that sets them apart from the competition. BKK's commitment to detail and innovation becomes evident in the hand-ground treble hooks that guarantee precision, sharpness, and reliability. Whether you're a seasoned pro or an aspiring angler, you'll find the most advanced and reliable treble hooks on the market.

GT-REX

ULTRA ANTIRUST

The largest treble hook that concentrates the highest technology of BKK to serve the most extreme anglers.

We developed the GT-REX to challenge the biggest GT and Bluefin Tuna in the world on poppers and stickbaits. The design of GT-REX emphasizes superior hook-up ratio and excellent impaling power coped with strongest wires and super anti-rust feature. Processed through the most advanced heat treatment, GT-REX uses BKK-B1W/V, the strongest material from BKK, to present its superior stretch power and resilience. The hook point of GT-REX adopts BKK's finest hook point processing technology to insure its ultimate impaling power. Meanwhile, sealed hook eye and advanced anti-rust technology equip this treble with a solid and long-lasting structure.

GT-REX's super sharp hook point goes into the deepest part of fish's mouth and impales its hard bones as soon as the fish swallows the lure.

The combination of a curved hook point and wide hook gap minimizes chances of escape.

GT-REX

The BKK GT-REX was developed to tackle massive giant trevally and tuna. The Hand Ground hook point of the GT-REX coupled with BKK's signature Ultra-Antirust Coating ensure sustained sharpness and penetration performance. All the details of GT-REX from the hook eye to the points have been engineered to create simply the best-performing treble hook for your saltwater popping.

GT-REX BL

The GT-REX BL is developed to tackle massive giant trevally and tuna. The barbless version of the well-known GT-REX allows for an enhanced survival rate of the fish when C&R. Also, fishing barbless treble hooks eyes at on-board safety when casting among other anglers: fishing charter-approved!

BKK-RAPTOR-Z

When you're going after "monsters"

BKK-RAPTOR-Z incorporates the latest hook making technology and BKK's legendary hand-crafting finishes. This is a hook that was designed with only one thing in mind: to hook strong and aggressive "monster" fish and stay hooked to the very end!

Our fully welded Micro Ring is formed once the hook shank has undergone a special grinding process. The strength of the ring is maintained while providing a slim profile that makes attaching a split ring super easy.

BKK's proud hook point processing technology insures the ultimate impaling power.

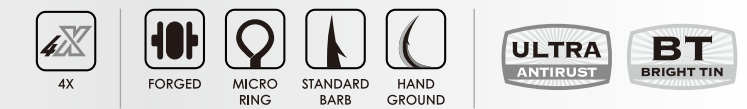

Short welded section increases the elasticity of the hook to reduce its possibility of being pulled open.

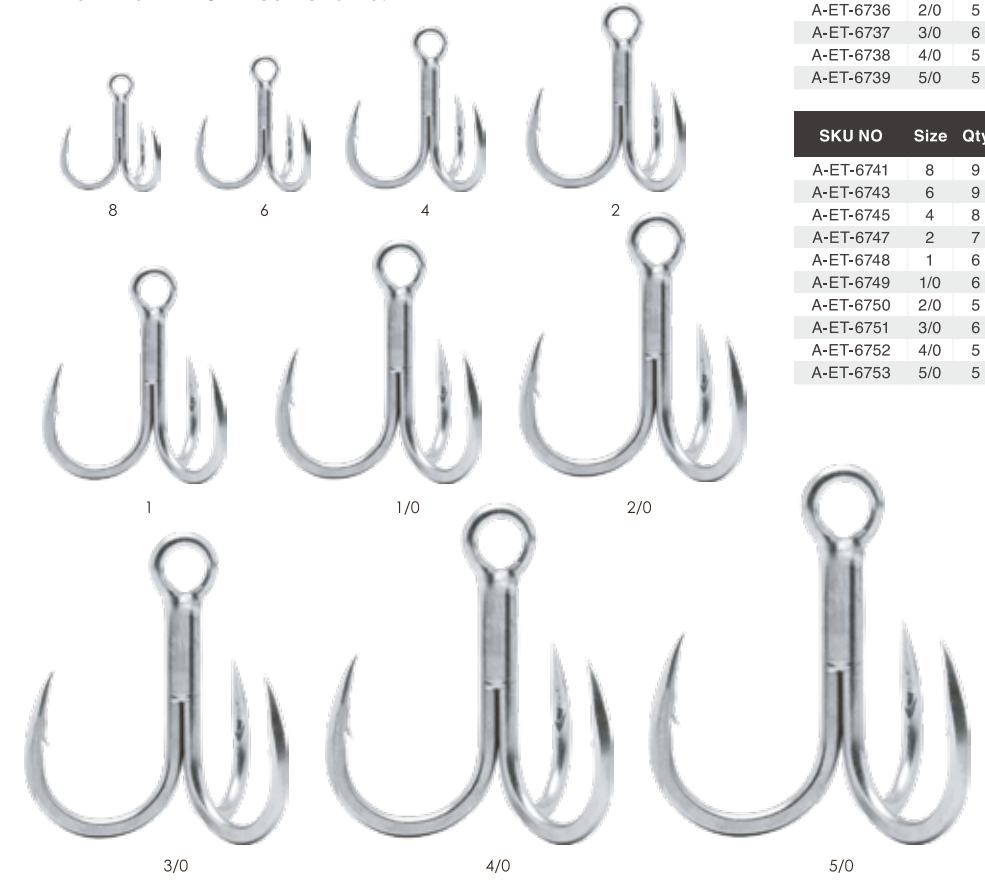

A wide gape and deep hook point design greatly reduces the chance of the hook coming off in the heat of combat.

Perfectly curved hook maximizes strength and resilience.

RAPTOR-Z

BKK engineers were asked to design a hook to tackle the strongest, most aggressive "Monster Fish" anyone could think of. The job requirement for a hook with not only superior impaling power and high hook-up ratio, but one that could also be super strong and highly resistant to corrosion. This is how the RAPTOR-Z came to life.

RAPTOR-Z BL

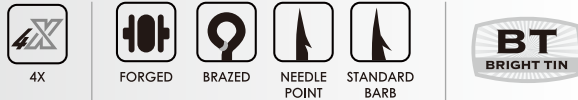

The Raptor-Z barbless has been developed to ease the release of the fish after the fight and to avoid causing much damage to it. Barb aside, the features of the original Raptor-Z remain unchanged: inward hook point for a better holding power, the Hand-Ground processing to increase the penetration and the Micro Ring to ease the attachment of split rings.

VIPER-41

The Viper-41 is a strong and sharp 4x treble hook designed with long and straight needle points and a very aggressive bend.

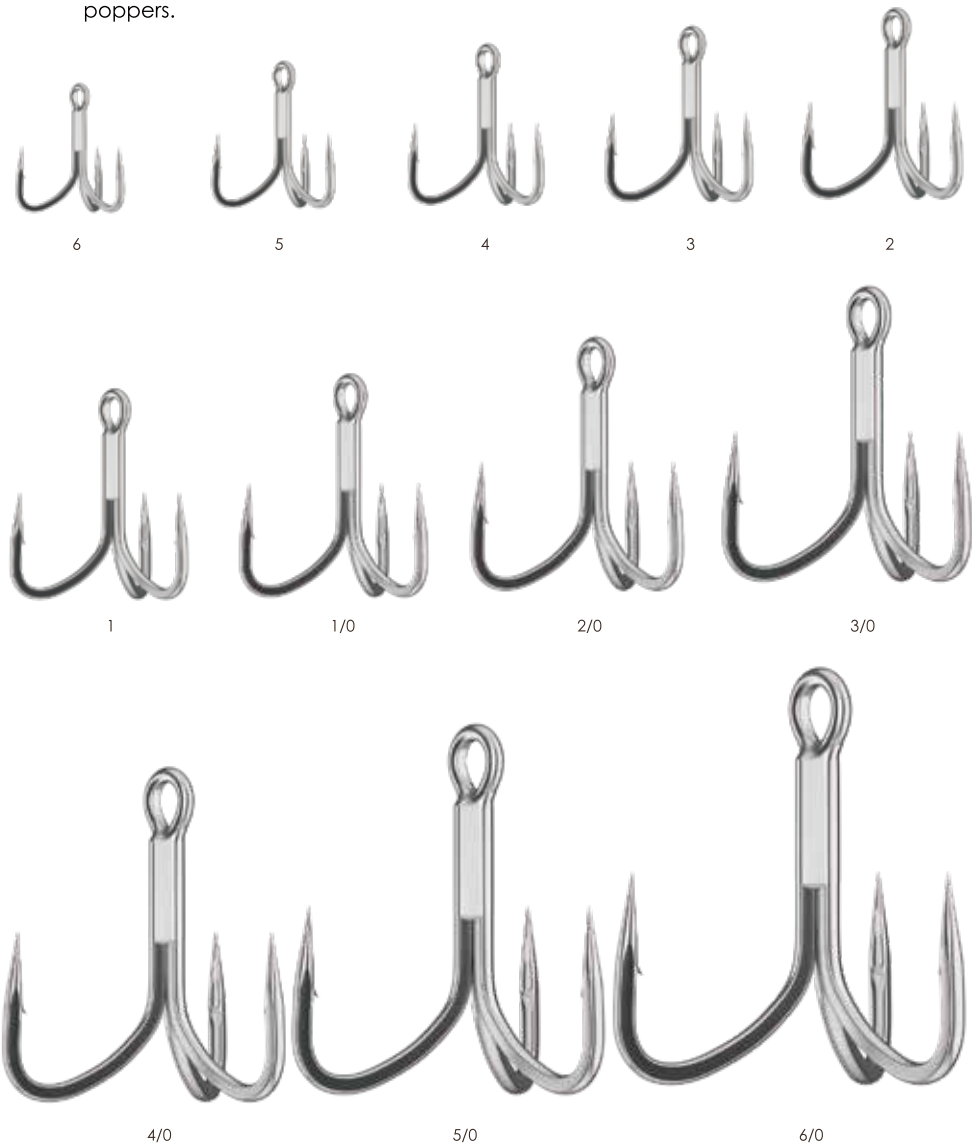

The design of the VIPER-41 stems from the experience made over the years with fast swimming diving trolling lures and surface skipping lures all around the world.

The straight point was chosen to maximize the hook-up rate when fish only hit the lure, while the aggressive shape of the bend ensures that the hook does not come off during prolonged fights or when the fish jumps out of the water.

To reduce the overall weight of the hook we shortened the welded section of the treble, thereby also providing more flexibility to the structure without affecting the overall strength.

The Viper-41 is coated in Bright Tin to resist even harsh saltwater environments and comes in a wide size range (6 to 6/0) to fit a huge array of lures, from small vibes to big SW stick baits and poppers.

RAPTOR-X

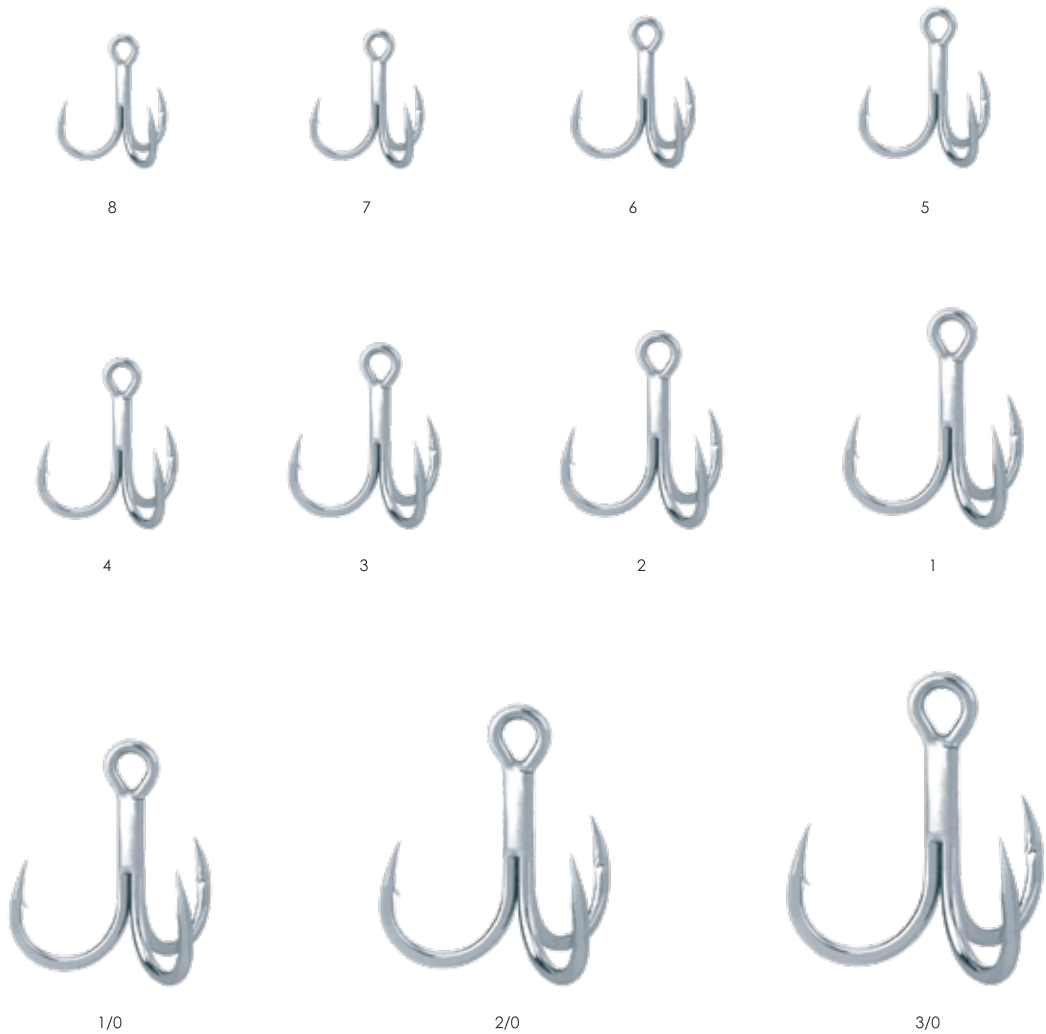

The RAPTOR-X is a 3X-wire treble hook whose design is inspired by one of the best treble hooks BKK ever launched: the RAPTOR-Z.

The hook gap-shank proportions are maintained to equip the RAPTOR-X with excellent holding power, yet the hook point is slightly straightened to enhance the hook-up rate, further heightened by the slimmer profile of the wire and by the Hand-Ground processing technology.

Featuring a lighter wire and being available also in very small sizes, the RAPTOR-X can be suitable to arm smaller lures without affecting their swimming action. The lightness of the hook structure is increased also by the Hand-Ground processing, through which the hook is manually sharpened by removing material around the point.

The Bright-Tin coating of the RAPTOR-X aims at maximizing its performance in terms of saltwater corrosion resistance, being thereby suitable even for harsh saltwater environments.

FEATHERED SPEAR 21-SS

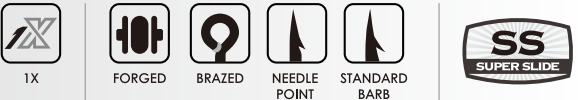

The BKK Feathered Spear 21-SS feature natural feathers and reflective fibers to enhance the presentation of the lure. When added to the back of a topwater bait, crankbait or spoon, they undulate and spread when pausing, enticing more strikes imitating a minnow's tail movement. The treble is our extensively-tested Spear 21-SS featuring a SS coating and needle point for excellent penetration. Feathers come in two different combinations: white and black/red. Binding thread is covered in epoxy resin to improve durability even after many strikes. Sizes range from 1 to 8 to cover a good range of lure sizes.

SPEAR EWG 71-SS

The SPEAR EWG 71-SS is a 1X-strength treble hook specially designed to be equipped on crankbaits of all types. The shorter shank enables this hook to sit closer to the body of your lure, minimizing the impact on its swimming action and the chances of snagging. The inward-looking points and the EWG (Extra Wide Gap) design reduces the chance of pulled hooks without affecting the hook-up rate. The SPEAR EWG 71-SS features BKK's signature SS coating that ensures smooth hook-ups and maintains the hooks' sharpness over time.

BB TRIGGER 21-SS

The BB Trigger 21-SS is BKK's stinger rig for big soft baits developed in collaboration with Black Bay Lodge. Undergone through extensive testing with numerous big Irish pike, this stinger rig boasts a set of features that re-defines the concept of a stinger rig:

- Front spring to secure the rig onto the bait
- Tempered stainless steel components for robustness and extended durability
- Stiff structure that perfectly adheres to the bait profile
- Pins covered in plastic material to secure the rig to the bait body
- SS coated BKK Spear 21 treble hooks for uncompromised penetration
- Stainless steel swivels to buffer torsional forces
- Pairable with the BB lead system to adjust the sinking speed and pattern of the bait

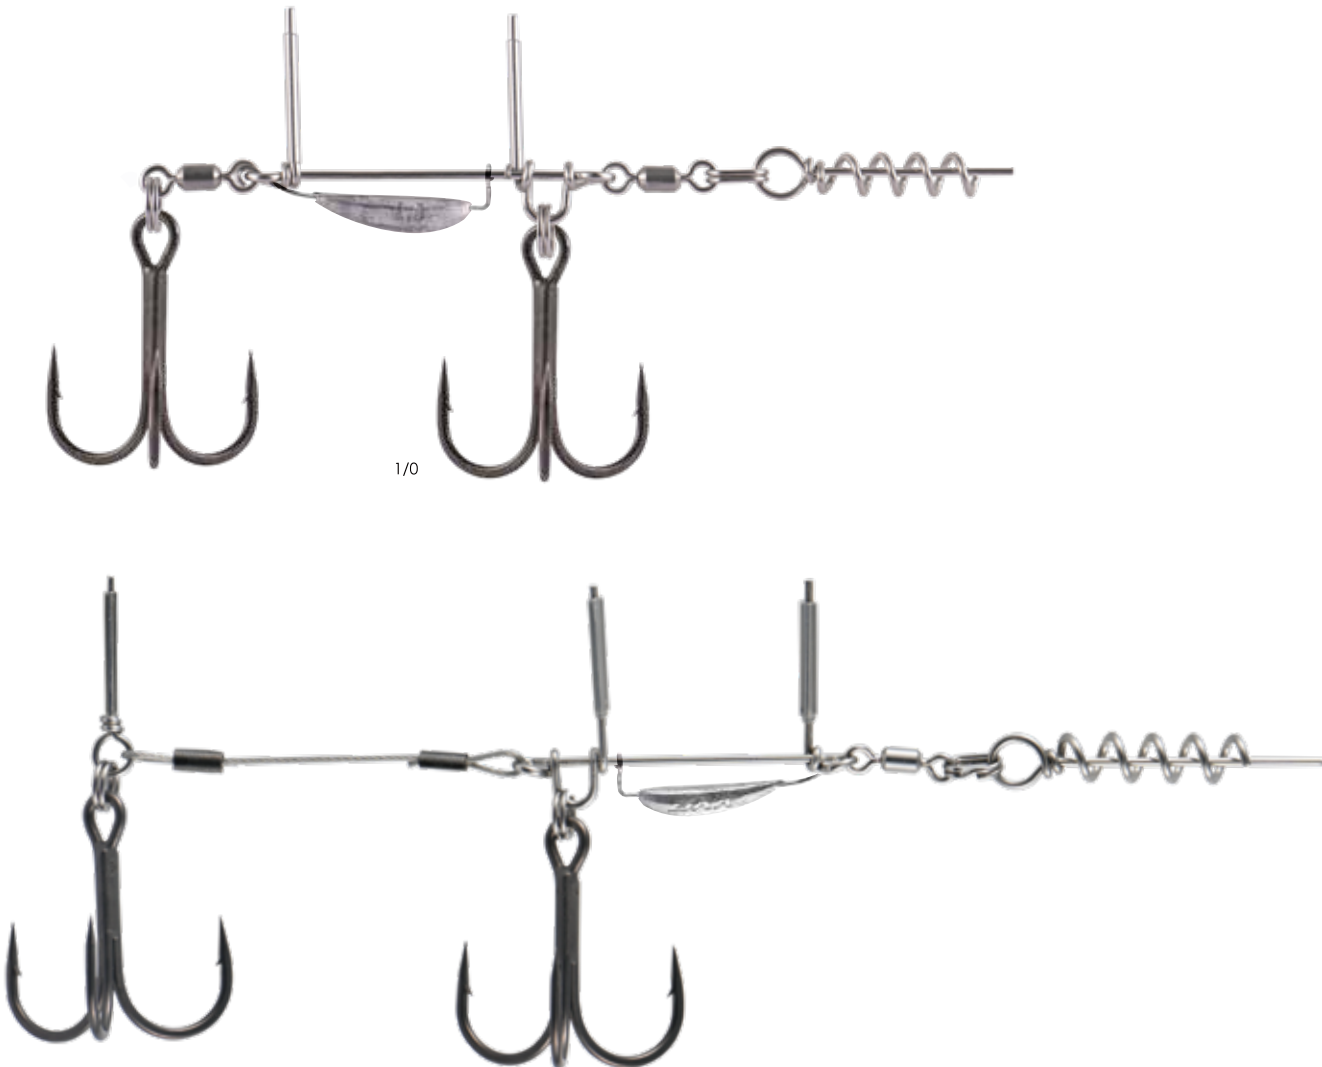

It comes in multiple sizes to suit a wide variety of soft baits. Adding the BB lead along the rig also stabilizes the swimming action of the lure and enhances its attractiveness during the fall. Ideal for stop-and-go retrieve.

- Front spring to secure the rig onto the bait
- Tempered stainless steel components for robustness and extended durability
- Stiff structure that perfectly adheres to the bait profile
- Pins covered in plastic material to secure the rig to the bait body
- UVO BKK Spear 21 treble hooks for uncompromised penetration and improved attractiveness in deep water and periods of low visible light, like dawn, dusk and overcast conditions
- Stainless steel swivels to buffer torsional forces
- Pairable with the BB lead system to adjust the sinking speed and pattern of the bait

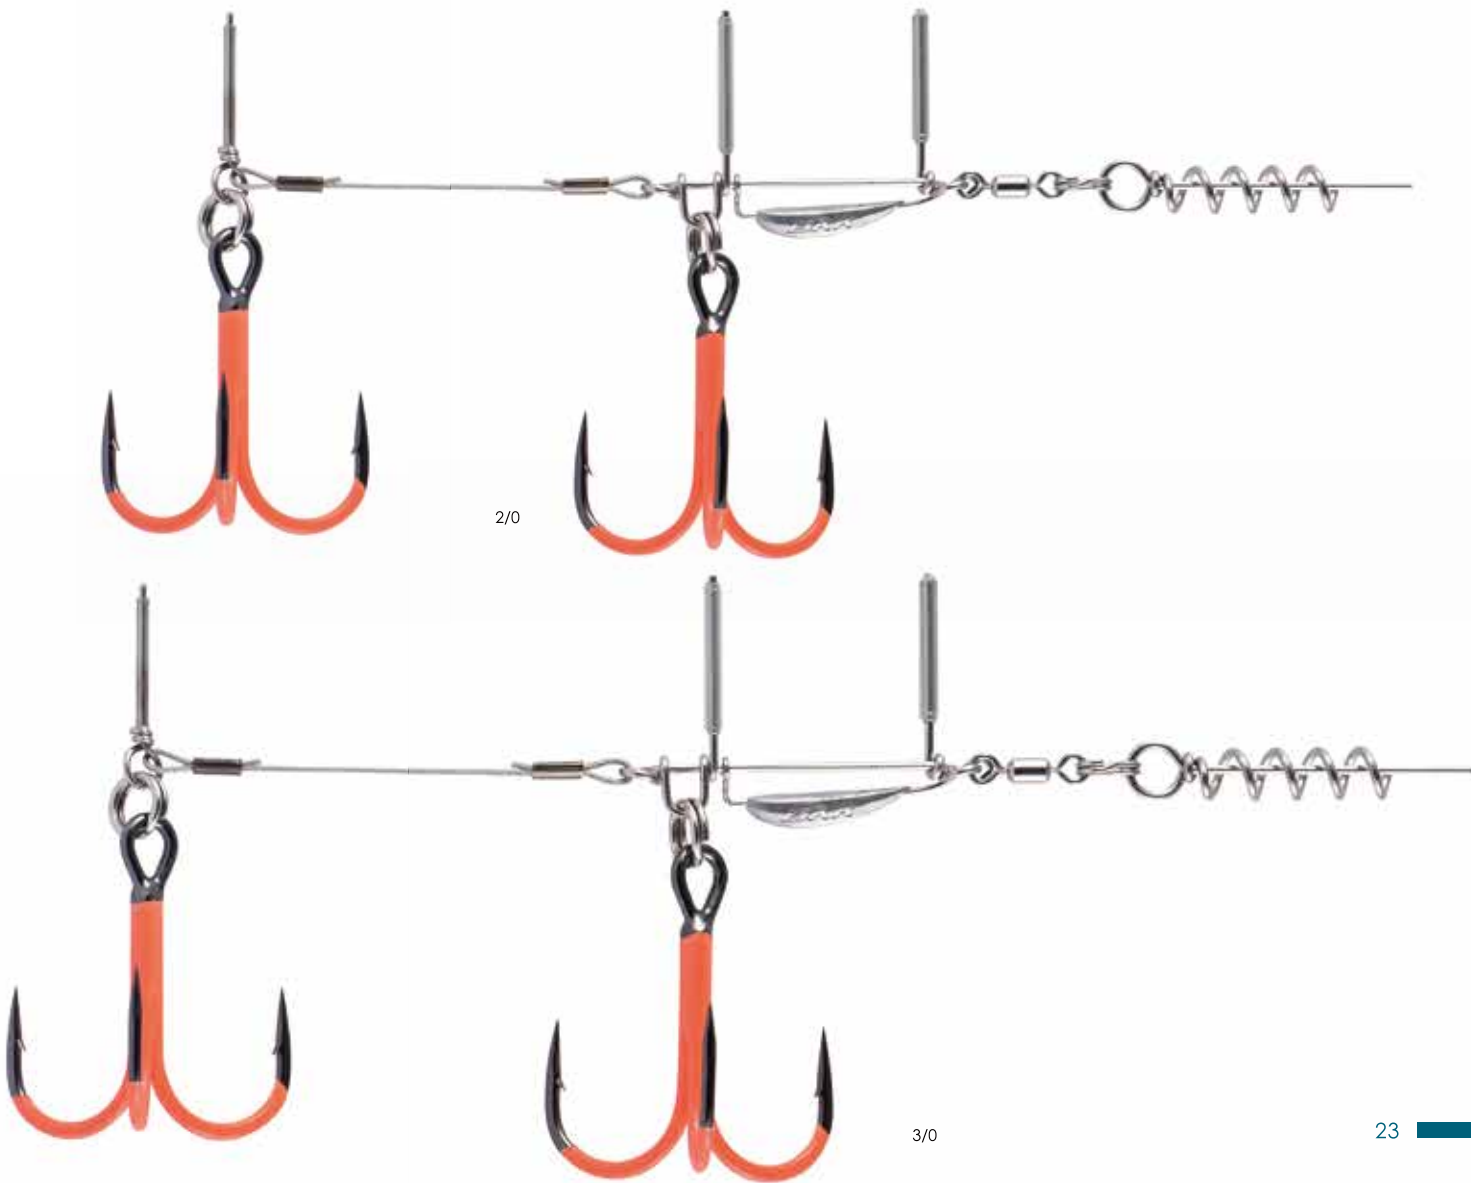

It comes in multiple sizes to suit a wide variety of soft baits. Adding the BB lead along the rig also stabilizes the swimming action of the lure and enhances its attractiveness during the fall. Ideal for stop-and-go retrieve.

REPLACEMENT SINGLE HOOKS

BKK's advanced manufacturing techniques ensure that each hook is precisely engineered for maximum strength, penetration, and holding power. Whether you prefer singles for their improved safety or weight savings, each hook is hand inspected to ensure you will land your next catch. Upgrade your fishing game with BKK inline single hooks, and experience the unmatched power, performance, and durability that only BKK can deliver.

PLUGGING
SINGLE HD

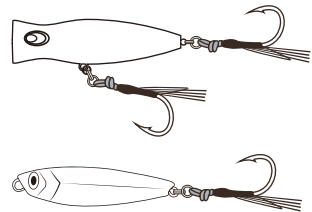

The BKK Plugging Single HD is an assist hook developed to cater to heavy-duty saltwater lure fishing and can be a performing alternative to common treble hooks, when reduction of torsional forces is most needed.

In fact, the hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and lower chance of the hook coming off. Besides, the single hook causes less damage to the fish, allowing for an easy and fast release.

Additionally, shimmering fibers have been added to further enhance the attractiveness of your topwater lures. Finally, a strong in-line solid ring allows for an easy and strong connection to the split ring.

PLUGGING
DOUBLE HD NEW

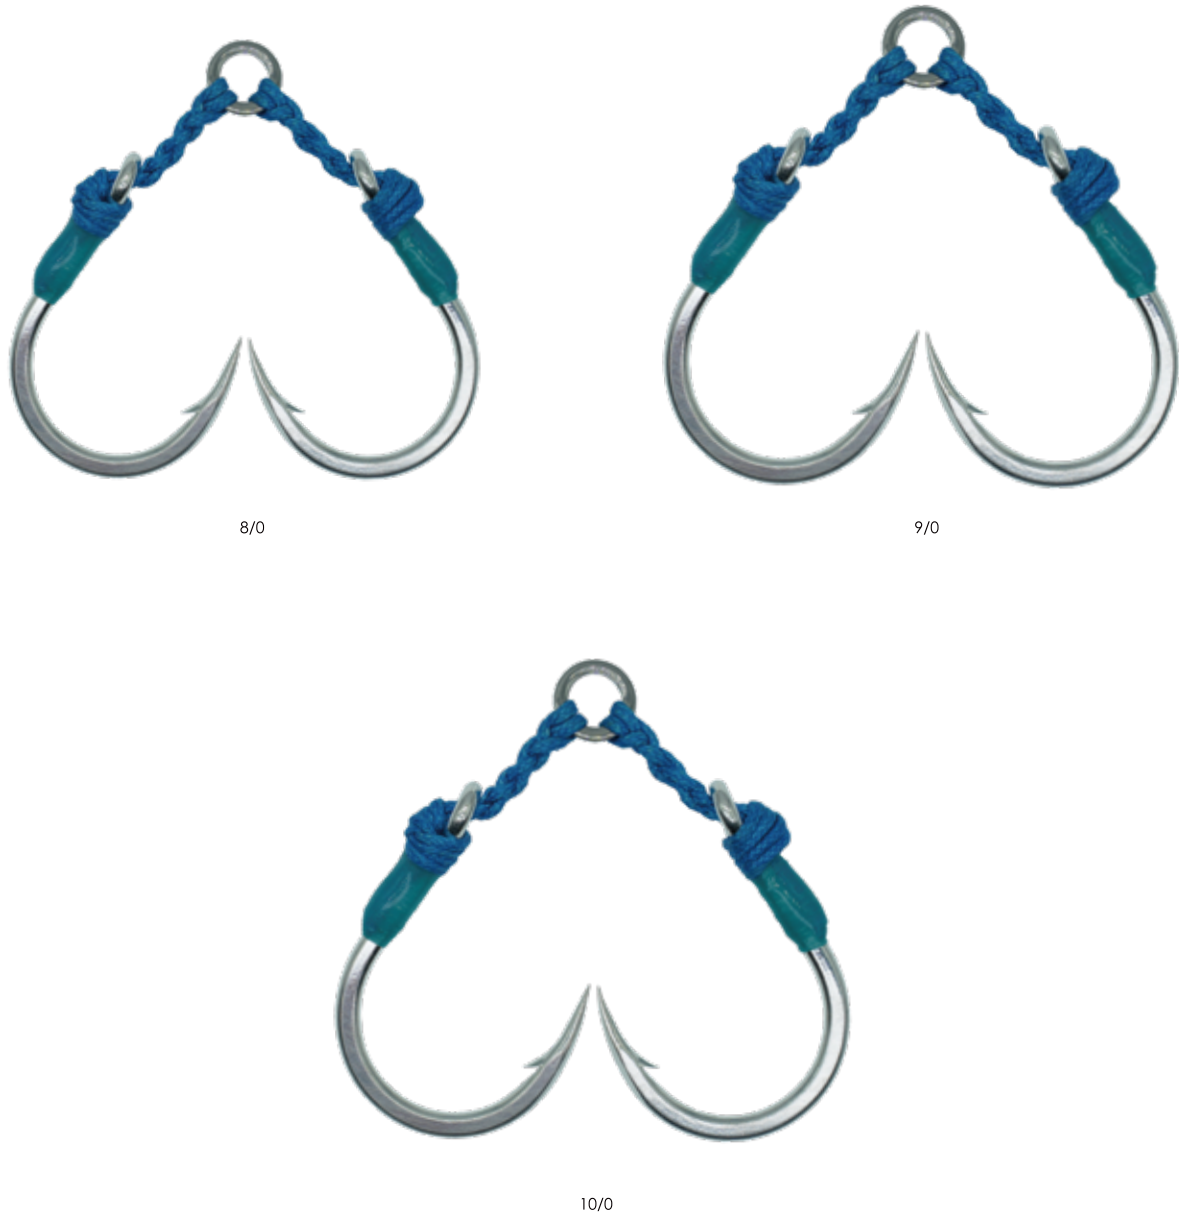

The BKK Plugging Double HD is a double assist hook developed to cater to heavy-duty saltwater lure fishing and can be a viable alternative to common treble hooks when reduction of torsional forces is most needed. The hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and a lower chance of the hook coming off. Suitable for rigging stick baits and poppers as well as a great assist for heavy jigging applications. The two hooks are tied individually to the ring allowing for two different presentations: hook points facing outwards for improved hook-up rate or facing inwards to reduce snags.

BKK-LONEDIABLO NEW
BUCKTAIL TEASER HOOK

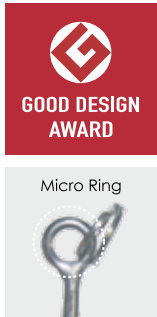

The BKK-LONEDIABLO BUCKTAIL TEASER HOOK is the ideal choice for replacing the trebles on hard baits when targeting striper, tuna, and other king size saltwater game fish. Built on 5X saltwater grade BKK-LONEDIABLO hooks, these teasers combine the dynamic motion of genuine bucktail with the flash of holographic fibers proving to drive fish wild. The binding thread is covered in epoxy resin to improve durability, even after many strikes. These teasers are not limited to just topwater baits; they make a great addition to a variety of other rigs like jigs, shallow divers, and deep divers to attract more attention to your bait.

LONE DIABLO

Lone DIABLO hooks have been developed to be used on lures like stickbaits and poppers.They embody all BKK best technologies and centennial experience.HG point ensures easy penetration,the unique design guarantees perfect hookset,and UA coating ensures enduring performance.

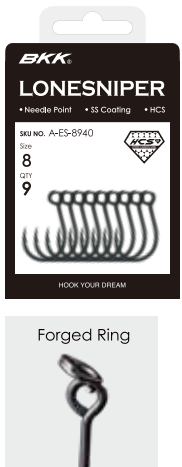

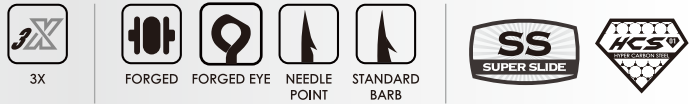

BKK developed a fabrication process for hooks carrying our Micro Ring label.Part of this process involves manual grinding before the material undergoes cold forging.The result is a strong slim ring profile that makes for easy attachment with split rings.

LONESNIPER

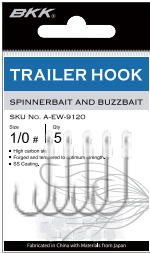

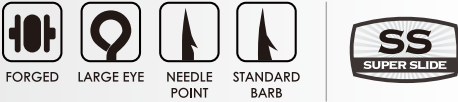

The BKK LONESNIPER is an inline single hook developed for freshwater and saltwater inshore applications. Features include a needle point and SS (Super Slide) coating that provides cutting-edge sharpness and penetration performance. The peculiar hook shape maximizes the hookup rate and maintains the grip throughout the fight. In addition, the BKK proprietary HCS (Hyper Carbon Steel) enables the overall structure to achieve unprecedented levels of strength.

1. FORGED RING
- The Forged Ring Technology results in a smaller section that makes fitting split rings easy and quick.
2. SS COATING
- The Super Slide coating increases the hook penetration performance due to the extremely low coefficient of friction the PTFE coating provides.
3. HCS - HYPER CARBON STEEL
- BKK's proprietary HCS (Hyper Carbon Steel) is 25% stronger and 30% harder than traditional high-carbon steels. This enables the structure to achieve unprecedented levels of performance.
4. HOOK DESIGN
- The hook design is inspired by one of the best single hooks BKK ever launched: the LONEDIABLO. The profile has been designed to optimize the hookup rate while minimizing the chance of pulled hooks.

TRAILER HOOK

The BKK Trailer Hook is designed to fit most of the small-to-medium spinnerbaits on the market, enhancing their hook-up rate. The packaging includes silicon pins and silicon tubings to allow for several rigging options catering different fishing applications. The hook features a Super Slide coating to enhance penetration and a sticky-sharp needle point.

SWIMBAIT HOOKS

Discover BKK's Swimbait Hooks - the TitanRider, TitanDiver, and TitanDiver+. Trusted by leading lure manufacturers including NLBN, these hooks are engineered for ultimate performance and durability. The TitanRider keeps shallow diving swimbaits horizontal, while the TitanDiver tracks medium-depth swimbaits smoothly, and the TitanDiver+ is perfect for deep diving swimbaits with its patented interchangeable weight system. All three feature BKK's advanced manufacturing techniques and Super Slide coating for corrosion resistance & increased penetration performance. Upgrade your swimbait game with BKK's Swimbait Hooks and experience their unbeatable strength and precision.

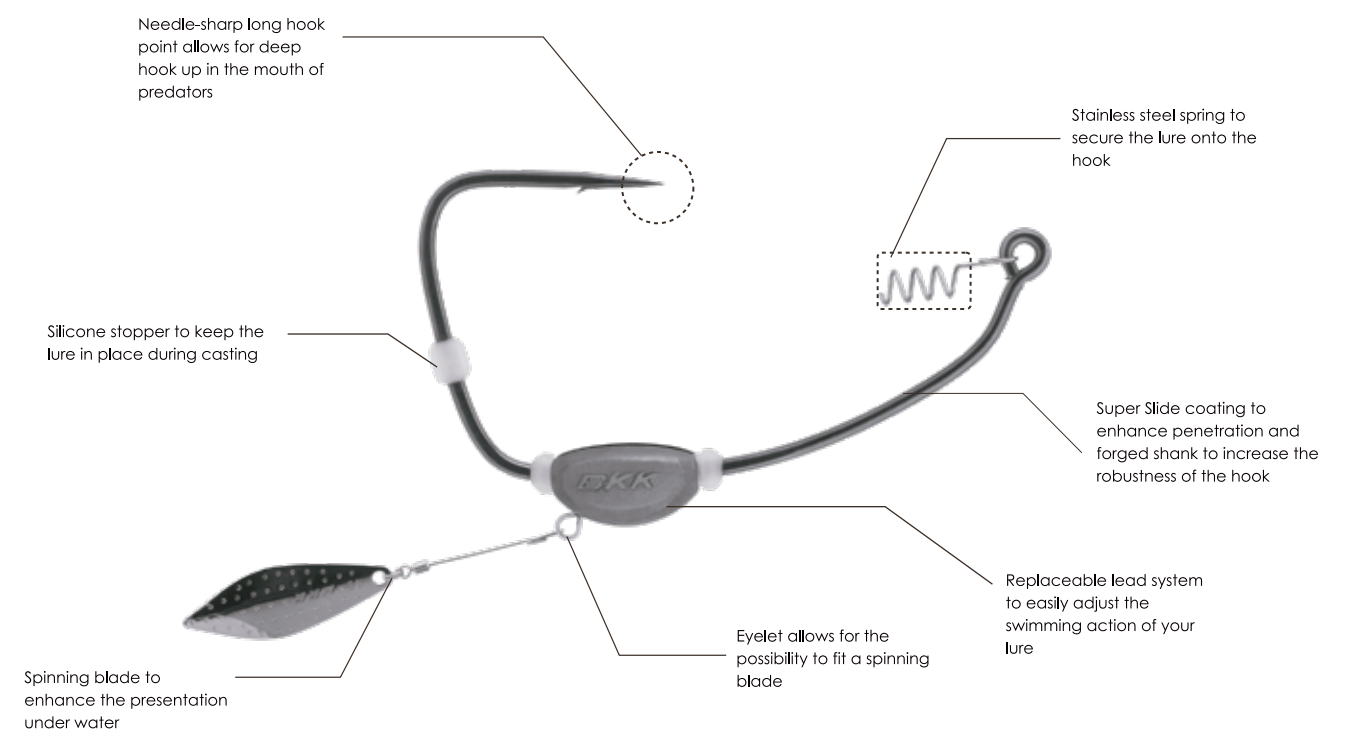

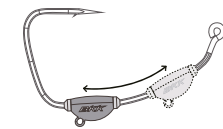

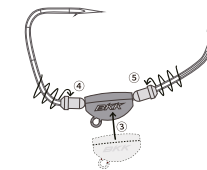

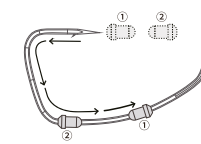

TITANDIVER+

The first member of the TITAN family was introduced just a few years ago and it soon became one of the most popular swimbait hooks for some of the biggest freshwater predator species. The fact it was bestowed the 2021 Good Design Award in Japan was a testament to the innovative features and design of the hook.

The more we used it, the more we thought about how to improve its set of features. In 2020 the TITANDIVER was born, stabilizing the swimming action and featuring a blade to enhance attractiveness.

In 2021 the latest generation of the TITAN series came to life: the TITANDIVER+, setting a whole new level for weedless lure fishing, from bass to bigger fresh and salt-water predators.

TITANDIVER+

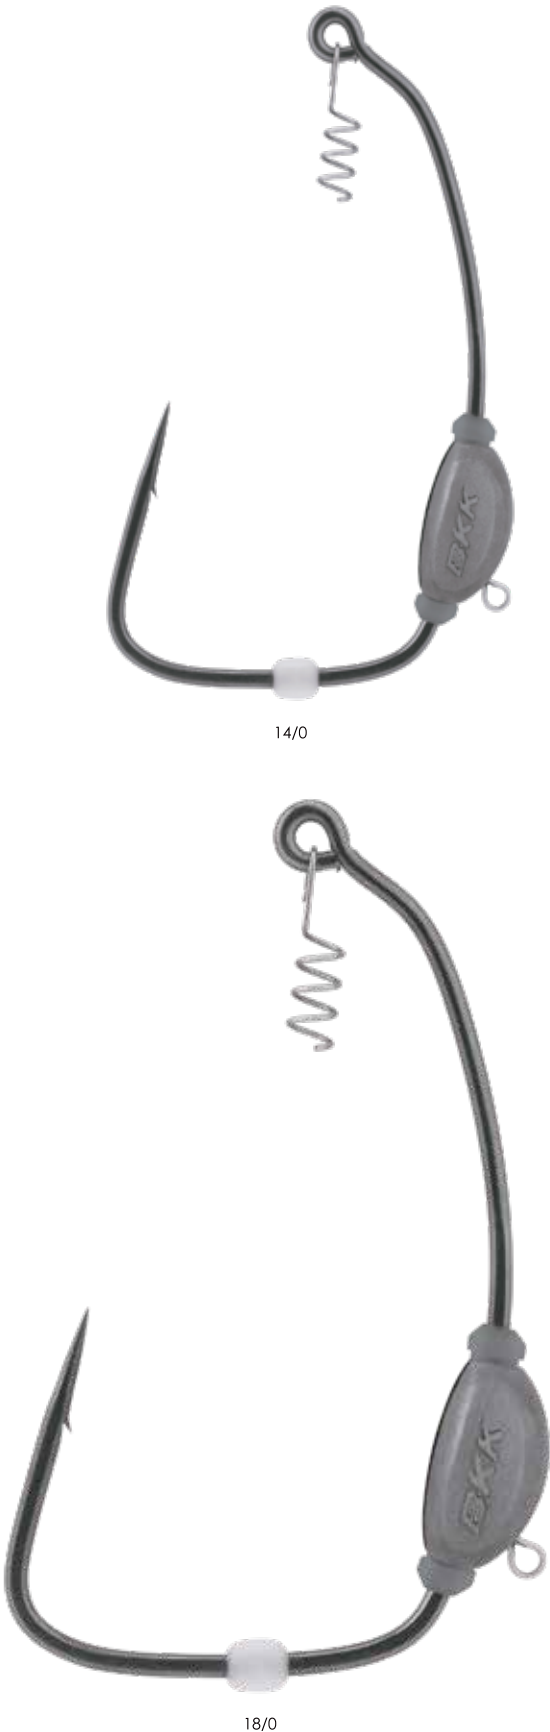

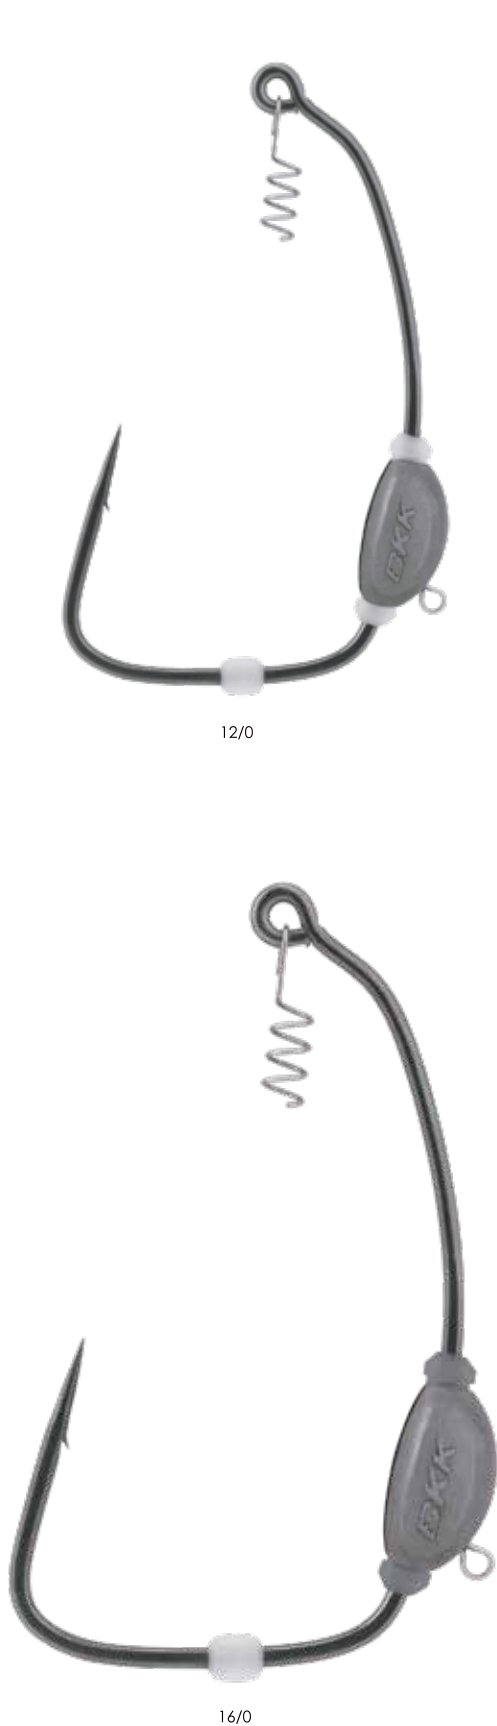

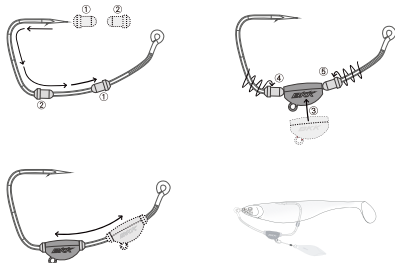

The BKK TITANDIVER+ is the ultimate evolution of the Titan series.

A breakthrough in the swimbait hook segments, the Diver+ inherits all the features of an ordinary TITANRIDER hook – Super Slide coating, needle point, spring and silicon stopper – enhanced with a simple, intuitive and effective lead – swapping system. The system offers many different combinations to add weight to your lure as the lead can slide on the shank, stimulating the creativity of anglers in adapting it to various fishing techniques and conditions.

The bottom eyelet on the weight allows for the addition of a blade to enhance the presentation of the lure.

TITANDIVER

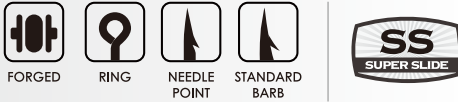

Released in 2018, the TITANRIDER paved the way for a whole new generation of strong worm hooks to rig even big soft plastic lures. This upgraded weighted version named Titan Diver is just the first step along the natural development of the series.

Designed to reach deeper spots, the TITANDIVER also comes equipped with a spinning blade for extra vibration and visibility, adding enticing glare to your lure presentation.

TITANDIVER

The BKK TITANDIVER is a new, upgraded version of the TITANRIDER, designed for weedless-style rigging of larger plastics. It features all the characteristics of the original TITANRIDER – a locking spring to secure the plastic lure, a silicone stopper to keep it in place and the super slide coating – boosted by the addition of a fixed lead to take the fishing action deeper in the water, scouting sunken structures where predator fish may dwell. The lead in turn features a stainless-steel ring to allow for the possible attachment of a spinning blade, improving the appeal of your lure.

TITANDIVER-GOLD NEW

The BKK TITANDIVER is a new and upgraded version of the TITANRIDER, designed for weedless-style rigging of soft plastics. It maintains all the features of the original TITANRIDER, including a locking spring to secure the bait, a silicone stopper to keep it in place, and the Super Slide coating. In addition, it features a fixed weight that aids in presenting the lure down into the strike zone. The weight itself is equipped with a stainless-steel ring, allowing for the optional attachment of a spinning blade. The blade adds a fish-attracting flash, enhancing the appeal of the presentation. The gold color blade has been added to the lineup for its excellent visibility in low light conditions and stained/muddy water. Silver is better suited for brighter conditions and clearer water.

TITANRIDER

BKK TITANRIDER is designed for weedless-style rigging of small to large plastics like swimbaits, worms and tubes. A locking spring securely holds baits in place and allows angler to easily add or remove bait without damage.

The adjustable silicone stopper keeps soft plastics in place during casting whilst allowing for sliding down the hook when a fish strikes.

HEAVY COVER

The BKK Heavy Cover is developed for flipping and punching techniques. This hook is equipped with an SS finish and an extra-short needle point to ensure an excellent penetration performance and an improved point strength. A special higher-carbon steel material is used to enhance wire stiffness, coupled with a forged shank to enhance hook robustness. The stainless steel baitkeeper provides consistently straight rigging and superior holding power, and is covered in epoxy resin for improved durability. Epoxy resin finish is also applied to seal the hook eye, ideal for tying snell knots with braided lines preventing line damage and slippage. The BKK Heavy Cover is designed to endure and perform when fishing through thick layers of grass and other heavy covers.

SKU NO	Size	Qty	PKG
A-EW-9711	2/0	4	10
A-EW-9712	3/0	4	
A-EW-9713	4/0	4	
A-EW-9714	5/0	4	

To achieve unprecedented levels of strength, these hooks feature BKK's proprietary **HCS** Hyper Carbon Steel that is 25% stronger and 30% harder than traditional steels.

To maintain its sharpness strike after strike, BKK designed an extra-short needle point that is beefy enough to not bend when piercing through the bony plates of the fish's mouth, and extremely sharp at the same time.

A prominent barb placed close to the point makes for instant penetration and helps hold the fish throughout the fight.

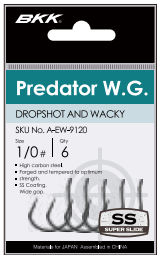

These hooks feature BKK's signature SS (Super Slide) coating that enhances the penetration performance, easing the hookset, and getting the hook firmly in the roof of the mouth every time.

Each hook eye is sealed with smooth epoxy resin to prevent line slippage or damage. Excellent for tying snell knots with braided line.

The stainless-steel bait holder keeps baits in place flip after flip, without having to constantly monitor the condition of the soft plastic. Precisely positioned on the shank to leave the ideal amount of space from the hook eye for tying a snell knot. To avoid slipping after many strikes, each keeper is locked in place with epoxy resin.

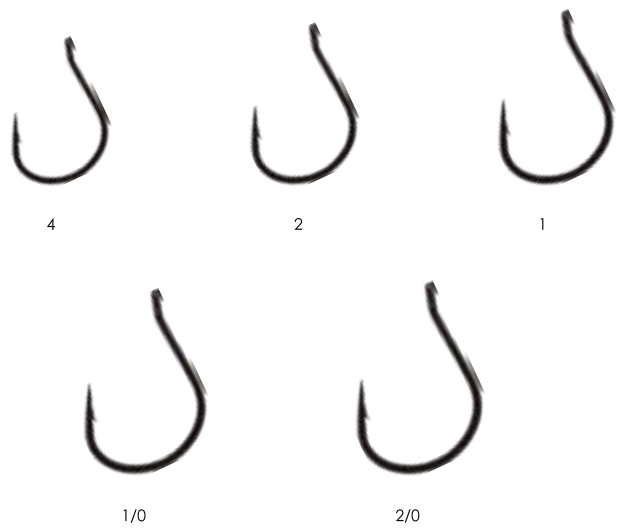

The shank of the hook undergoes cold forging that enhances hook robustness and its ability to resist deformation.

PREDATOR WG

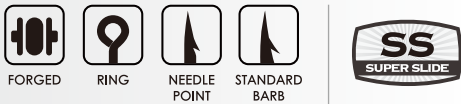

The BKK Predator WG is a freshwater finesse hook used for a variety of rigs such as Wacky and Dropshot, primarily for bass fishing. The wide-gap design and the Super Slide coating significantly enhance the hook-up rate, while the micro barb makes it suitable for catch and release. Despite its slim profile, the Predator WG is strong enough to fight big prey thanks to its forged shank.

JIGGING HOOKS

From small yet strong light-jigging to powerful deep-drop heavy-jigging applications, this series also includes top-notch components to couple our hooks with. Solid rings, shimmering and glowing fibers and assist cords are carefully selected to match the quality of our hooks and improve their appealing appeal in the water.

SF DEEP

ASSIST HOOKS

Pure Strength!

SF Deep comes pre-tied with high quality 4 strand PE assist cord and stainless steel solid ring to achieve unmatched holding performance. It is the best choice when targeting sea monsters when jigging.

BKK stainless steel solid ring is punched and forged to optimal strength. Chemically polished to create a smooth surface that prevents line damage.

4strands braided PE assist cord. Strong and durable.

Glow binding thread improves attractiveness in deep dark water. A hard layer of epoxy protects it from the fish's nasty teeth.

SF Deep jigging hook has a perfect circle body design to equally distribute load onto the hook. Extra-long hook point largely reduces the chance of pulled hook.

Precise Hand-Ground section
Reduce hook-set resistance by 25%
HG point structure

SF Deep jigging hook utilizes cutting-edge technology to create a bayonet-like hook point. The razor-sharp hook point has been hand-ground and hand-polished to provide excellent penetration and break into the hardest bone of fish's mouth.

Small-barb design effectively reduces hook-set resistance to ensure solid hook-set and avoids causing too much damage to the fish when C&R.

SF DEEP-LONG NEW

The BKK SF DEEP-LONG is the long assist version of BKK's meanest jigging assist, the SF DEEP. It maintains all the features of the shorter model: razor-sharp Hand Ground point for improved penetration, a perfectly welded ring and forged bend for enhanced strength, slim shanks for weight reduction, tin coating for excellent saltwater corrosion resistance, and 4-strands braided PE assist cord for long-lasting performance. The addition of the longer assist cord makes it the perfect match for longer knife jigs when fish bite short.

DEEP

The BKK Deep jigging hook combines the strongest high carbon steel and superior heat treatment to achieve high strength and elasticity. It also adopts BKK's unique hand Ground point to achieve excellence in penetration. Hook shank grinding and welding minimize the diameter of the hook shank thereby reducing the overall weight without affecting its structural strength. The high-corrosion-resistance coating enhances the durability of the hook.

SF REEFMASTER NP

The concept underlying the development of BKK SF Reefmaster NP jigging assist hook is to provide anglers with a quality product equipped with a high cost-performance ratio. This assist hook comes pre-tied with a high-quality 16-braided-strand assist cord for optimum strength and flexibility.

The glow binding thread on the hook helps stimulating strikes even in low visibility conditions. The hook itself also features BKK's signature hook technologies including the micro ring technology and corrosion-resistant bright tin coating.

REEFMASTER SERIES

Reefmaster is a fine jigging hook that can be successfully used in any ocean around the world to target many different species of fish. Our goal when we designed this hook was to obtain a product that could pierce with ultra high efficiency also on light tackle, hold out against big fish, and maintain these qualities throughout many strikes.

For these reasons we adopted BKK-81WV high carbon steel, welded ring, long curved point and bright tin coating.

The wide gape design ensures deep and solid hook-ups every time. With a curved shape and barb, there is no chance for the fish to shake off the hook.

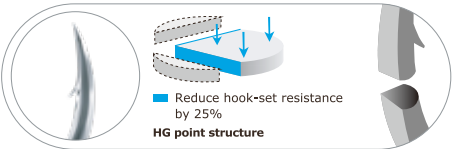

Reef master hooks creatively combine superior grinding and welding technology to minimize the diameter of the hook shank thereby lowering the overall weight of the hook without affecting its structural strength. The welded eye also eliminates the risk of damaging the assist cord during prolonged fights.

REEFMASTER HG

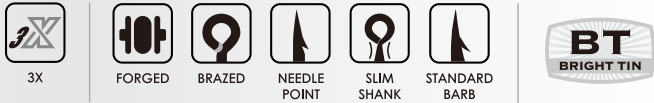

Reefmaster HG utilizes cutting-edge technology to create a bayonet-like hook point. The razor-sharp hook point has been ground and polished by human hand to provide excellent penetration to break into the hardest bone of fish's mouth.

REEFMASTER NP

The BKK Reef Master NP is developed to be a high cost-performance ratio versatile jigging hook. A perfectly welded ring and BKK's accurate forging process enhance the overall strength of the hookstructure, also reinforced by a bright tin coating providing excellent corrosion-resistant performance even in harsh saltwater environments. In order to ensure solid hook ups every time, this hook also features BKK's needle sharp hook point. Last but not least,the hook features BKK's Micro Ring technology that allows for an adequate hook eye diameter and reduces the overall weight of the hook, without affecting its structural strength.

LIGHT SLOW FALL

BKK SF Lentus hooks have been developed to target deep-water monsters with the slow jiggging technique. For this reason they have been designed with an heavy gauge that can stop the run of a big fish and an inturned point that reduces snags, but once set in the fish mouth won't come off during the fight.

The hooks are tied using the BKK Fluoro Core Assist Cord to minimize tangles and improve hook penetration.

Thanks to the three lengths available, SF Lentus can be used with all kinds of jigs.

LENTUS

The BKK Lentus owes its superb penetrating power to the Bright Tin coating and Delta Point technology. Lentus is so incredibly sharp it will greatly improve your catch rate!

This hook is geared to target deep water monsters with the slow jigging technique. For this reason, it has been designed with an heavy gauge that can stop the run of a big fish, and an in-turned point that once set in the fish mouth won't come off during the long fight.

1.DELTA POINT

Delta Point hooks have laser-sharp tips with leading edges designed to reduce surface contact area. These hooks will pierce through the toughest armor with ease.

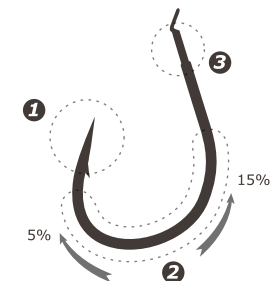

2.SPECIAL FORGING PROCESS

Varying amount of pressure is applied along the shank as the hook is being forged. The benefits of this unique process (5% deformation below the point and 15% on the bend) is an effective combination of high tensile strength and ability to hold the fish without cutting through the skin.

3.FLAT SHANK

Unlike conventional round-wire hooks, here the hook shank is squared. Once the assist cord is securely fastened, there is no line slippage to cause unintentional change in the hook orientation.

GAFF-R

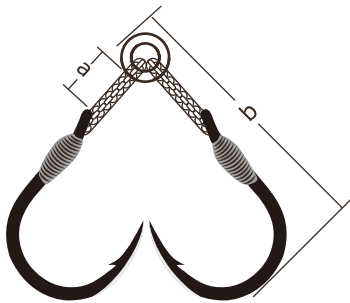

LIGHT SLOW FALL

The BKK SF Gaff-R has been designed for slow jigging applications. The Delta Point technology and innovative design ensure easy hook ups, even during free fall and without main line tension.

The hooks are tied using the BKK Fluoro Core Assist Cord to minimize tangles and improve hook penetration.

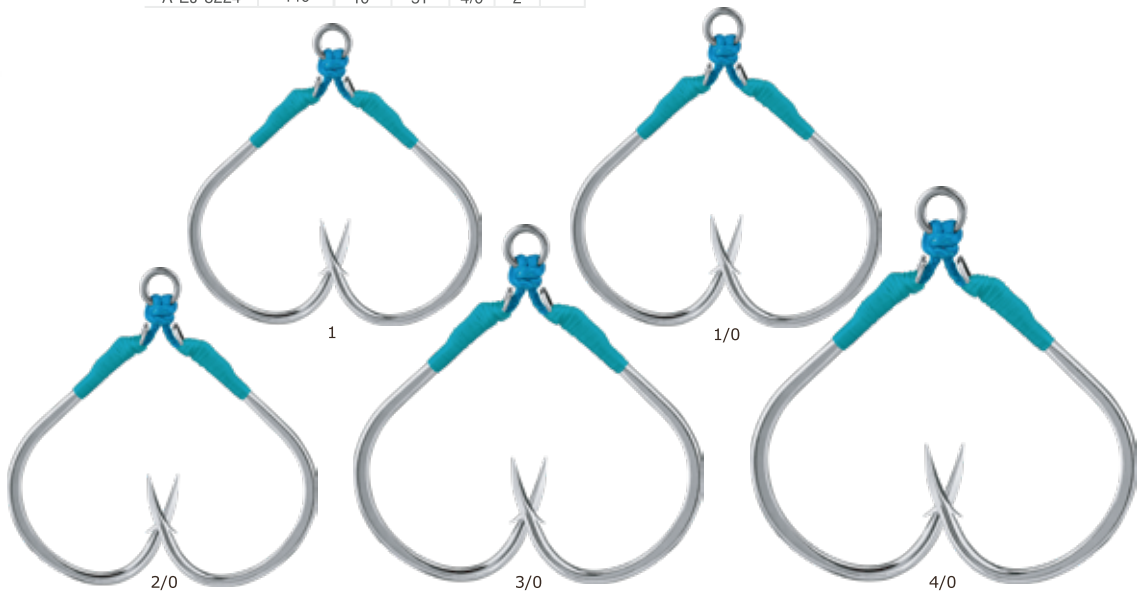

Thanks to the three lengths available, SF Lentus can be used with all kinds of jigs.

GAFF-R

The BKK Gaff-R is a versatile hook specifically developed for slow jigging. Designed with a wide gap and a short shank, it eases hook penetration even with very light pressure. Its Cutting Delta hook point further reduces piercing resistance and maintains the hook sharpness at all time, also thanks to the bright tin coating that protects the hook from saltwater corrosion.

The Slip-lock hook shank accommodates the line and secures the knot. A unique forging pattern prevents the fish's skin from being torn off over long fights, as the forging pressure is applied on a reduced portion of the hook shank, thereby strengthening the hook structure without creating edgy surfaces.

A-EJ-8214	4/0	6	

GAFF-R

SLOW JIGGING

1. DELTA POINT

Delta Point hooks have laser sharp tips with leading edges designed to reduce surface contact area. Fish may bite on the fall and the hook will penetrate just by the weight of the jig.

2. SPECIAL FORGING PROCESS

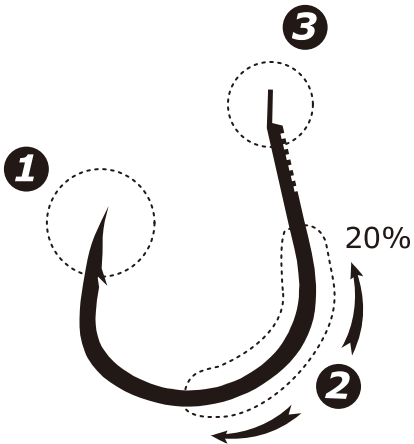

All the pressure is applied on a reduced portion of the shank as the hook is being forged. The benefits of this unique process (no deformation below the point and 20% on the bend) is an effective combination of high tensile strength and ability to hold the fish without cutting through the skin.

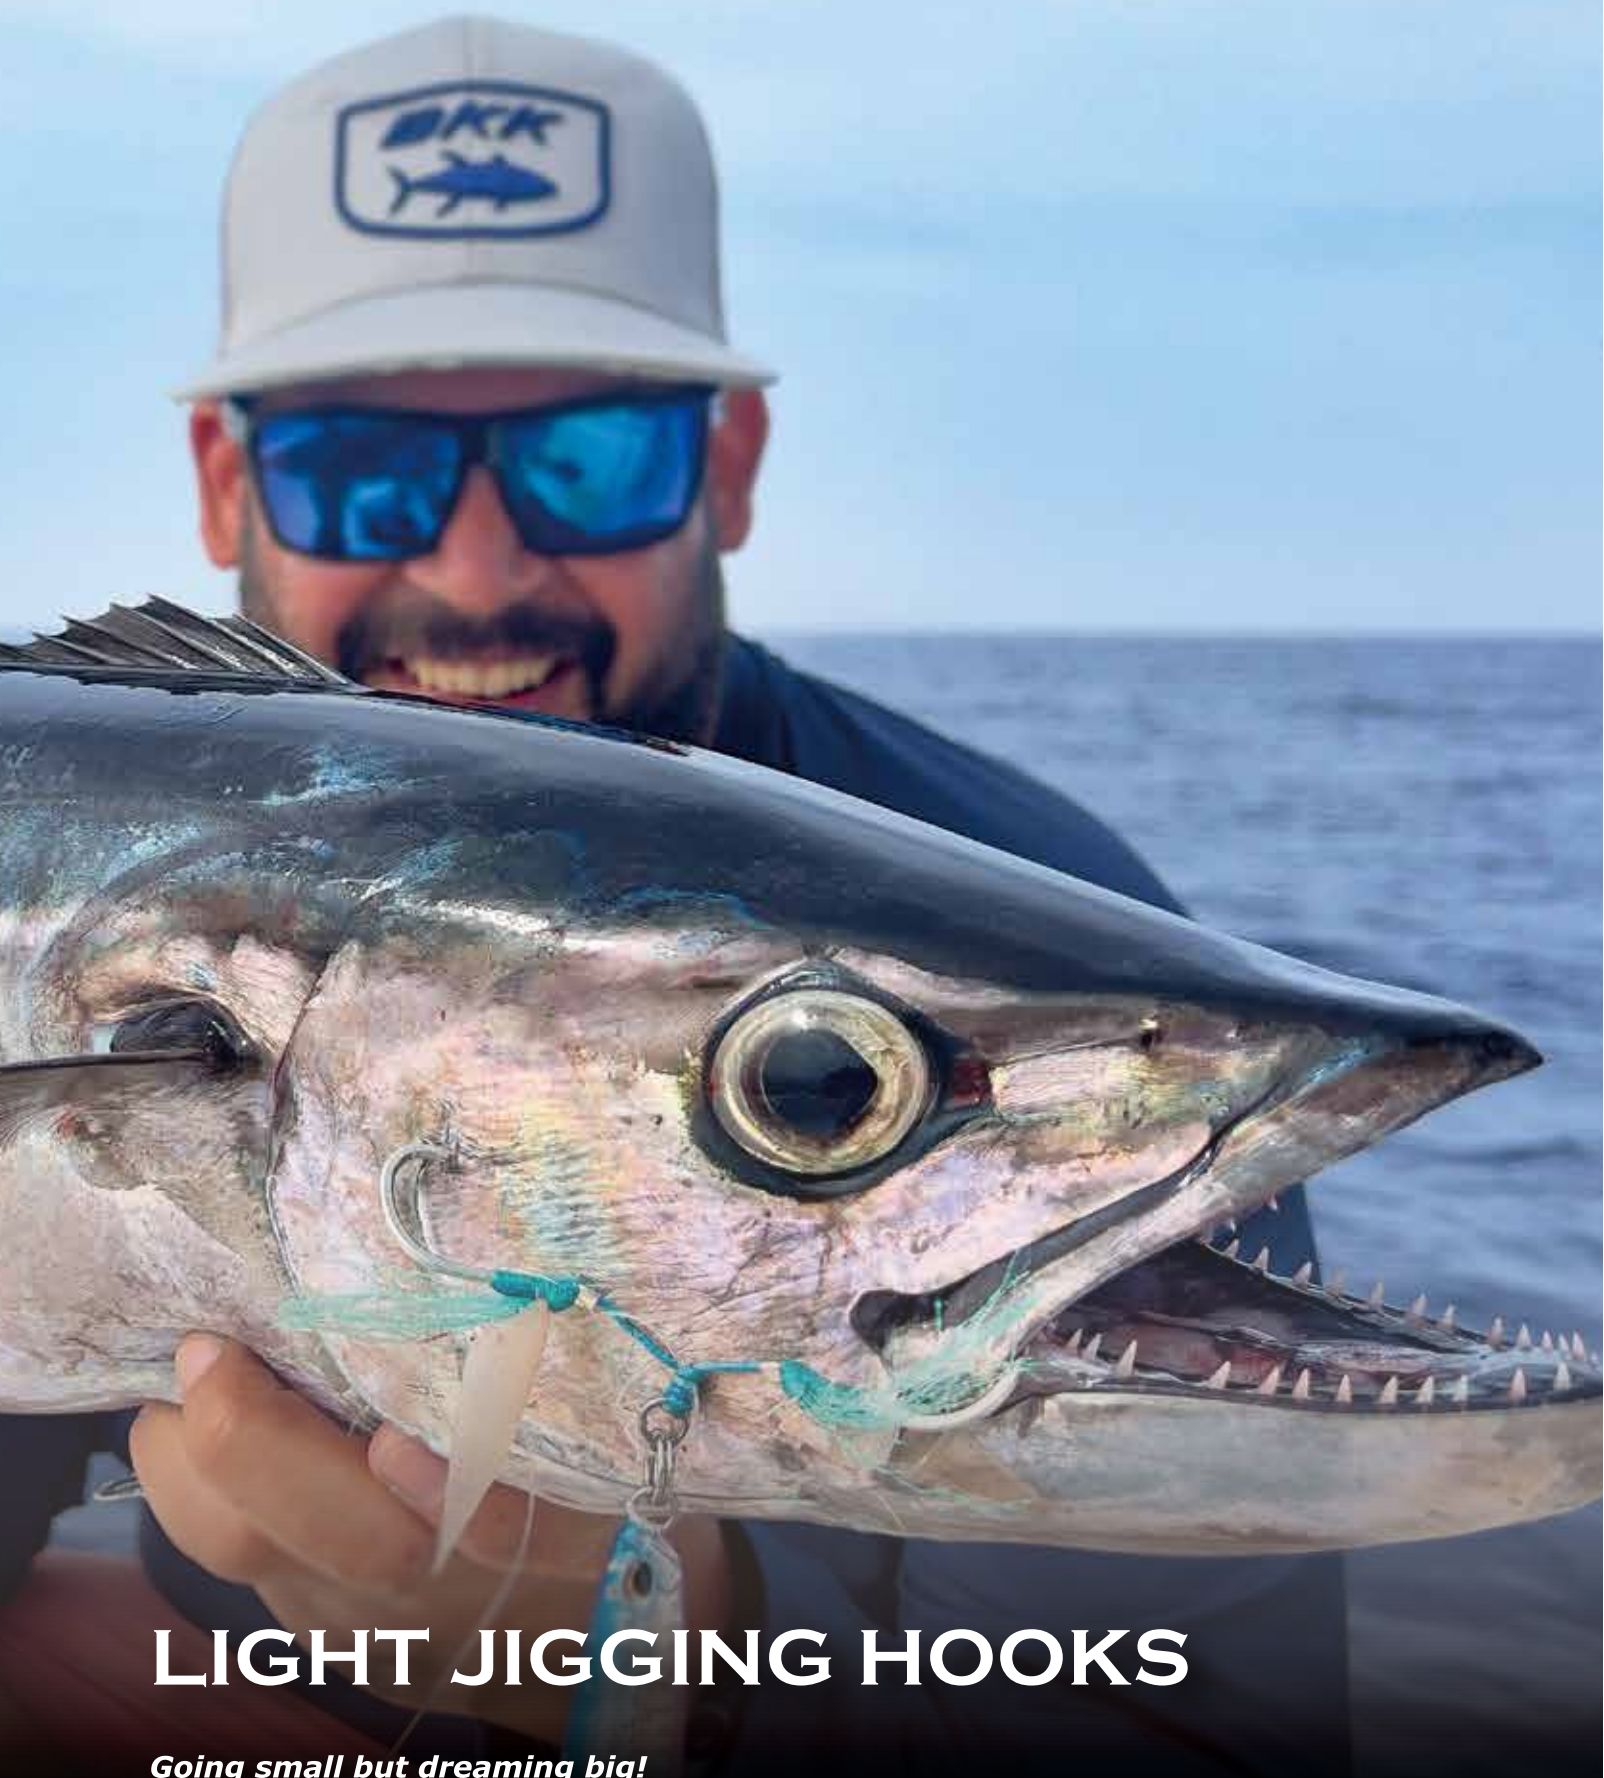

3. SLIP-LOCK

Unlike conventional round wire hooks, the special recesses on the back of the hook shank ease line connection and ensure that once the assist cord is securely fastened there is no line slippage to cause unintentional change in the hook orientation.

INNOVATIVE DESIGN

A wide gape and short shank enable the hook to catch and penetrate the fish's skin with the lightest force. The in-turned point reduces snags and once set in the fish's mouth won't come out during the fight.

LIGHT JIGGING HOOKS

Going small but dreaming big!

The wide variety of light jigging applications calls for a range of different assist hooks specifically engineered for each technique.

Extensive field tests all over the world and with different fish species have allowed us to develop light jigging hooks that can stand up to the most diverse and extreme fishing conditions.

Every single model has been designed to the highest of standards, and to perfectly blend strength and lightness, robustness and natural motion, sharpness and long-lasting performance.

Solid rings, shimmering and glowing fibers and assist cords have been carefully selected to match the quality of our hooks, improving their appeal in the water and favoring a natural presentation of your jigs.

SEA RANGER⁺

The BKK Sea Ranger⁺ features BKK's signature Hand Ground point, shimmering and glow fibers and super strong braided line. It is developed to target record fish on smaller jig presentations, both from shore and by boat.

TROLLING HOOKS

The Kajiki series of trolling hooks are geared toward blue water fishing for the world's largest and strongest fish. Whether it's high speed trolling for wahoo with the Kajiki HD, or light tackle aimed at mahi mahi, the hand ground points ensure a perfect hookup. Each Kajiki hook features welded rings, forged shanks, and are meticulously hand inspected to give the fisherman the ultimate trust to land the fish of their dream.

KAJIKI TROLLING HD

The BKK Kajiki Trolling HD is the ultimate trolling hook for billfish designed for 24kg-37kg class tackle. It features BKK's Hand Ground hook point that delivers superb penetration performance and the Bright tin coating that performs excellently in harsh saltwater environments. The perfectly welded ring and heavy-duty forged shank further enhance the strength of the hook. Kajiki Trolling HD is the go-to trolling hook when going after the world's biggest and strongest blue water species.

GLIDE`N SHAKE

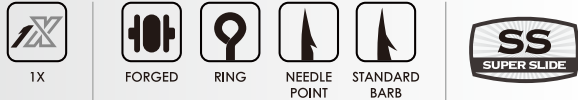

The BKK Glide`N Shake is engineered to combine both gliding and shaking presentations. The innovative bullet-head design allows for an optimal gliding action during the descent towards the bottom, and a flat surface on the front edge of the head makes it ideal for stand-up and shaking presentations once on the bottom. Hook size and weight are embossed on the head for easy selection. The hook features the SS coating and a needle point to ensure excellent penetration performance and a forged shank for improved resistance. The offset design eases Texas rigging soft plastics for a completely weedless presentation. Besides, the orientation of the hook eye reduces the chances of snagging as the hook-compared with an inline eye-is more likely to flip over the snag rather than leaning on one side.

DRAGGIN' NED

The BKK Draggin'Ned is designed specifically for Ned Rig presentations. Features include BKK's signature SS coating and a sharp needle point for enhanced penetration, and an O'Shaughnessy forged bend to maximize strength. We elaborated further on the concept of a classic Ned head by adding a series of details that make this jighead unique: a recessed eye to reduce snags and protect the knot when fishing over rocky bottoms, a baitkeeper designed to fit both elastomeric and standard soft bait compounds, and ribs on the underside of the head for increased sensitivity when dragging the bait on the bottom. The final touch is on the head, where size and weight specifications are embossed for easy selection. The Draggin'Ned comes in three different colors: plain lead, matte green pumpkin and matte black. It also comes in a weedless version featuring a nylon guard. Two sizes available (1 and 1/0), weight range 1/16 - 1/4oz. All these details and combinations make the Draggin' Ned the ultimate jig head for finesse standup approaches with 4-10lb lines.

2X ROUND HEAD

The 2X Round Head Jighead is our new version of a timeless classic jighead that finds application both in fresh and in saltwater environments. The Black Nickel coating enhances its ability to resist corrosion, at the same time protecting the needle point when jigging on the bottom. The 2x-wire and medium shank allow for stealthy presentations with small baits targeting big prey.

FOOTBALL HEAD

The Football-Head is a light jighead featuring a 0.8x-wire and a Cutting Delta point used for finesse presentations with small soft plastic lures on the bottom. The particular shape of the head is designed to jig over rocky bottoms avoiding snags, it also slightly changes the swimming action during retrieve and the fluttering action in free sinking compared to a round-head jighead.

HARPAX SERIES

The HARPAX Jigheads are the ultimate jighead to target record fish both in fresh and saltwater.

Straight point for immediate hook-ups and bright tin coating to prevent saltwater corrosion.

Front towing point for improved castability and improved stability on straight retrieves.

Perfect bait keeper for locking on most kinds of soft plastic baits including soft PVC and stretchy TPE baits.

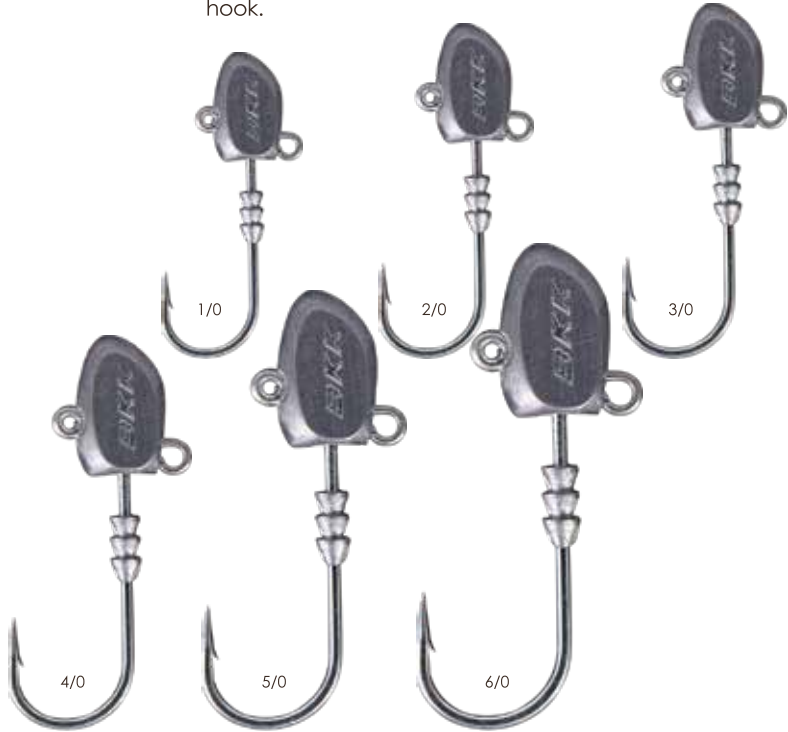

Bottom eyelet to upgrade the presentation with a teaser blade, an additional treble hook or inline single, or an assist hook.

HARPAX INSHORE

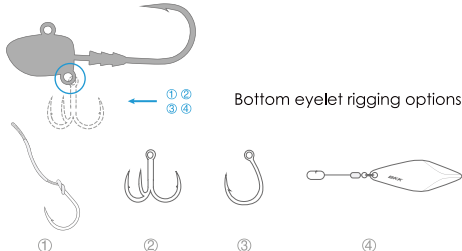

The BKK Harpax Inshore is a short shank 2x-wire HD jighead equipped with corrosion-resistant Bright-Tin coating developed to be used primarily in saltwater environments. The straight point delivers immediate hook-ups, while the bait keeper is designed to fit most kinds of soft plastic baits including scented, floating or sinking baits whose plastic blend may vary significantly.

It features an eyelet on the bottom of the head to upgrade it with a teaser blade, an additional treble hook or a assist hook.

HARPAX OFFSHORE

The BKK Harpax Offshore is a super heavy-duty jighead designed with a 4x wire and a straight point to be able to penetrate fast and withstand extended fights with blue water giants. The design of the bait keeper can accommodate many types of different soft plastic lures. It features a Bright Tin coating to prevent saltwater corrosion and two additional eyelets on the head.

SILENT CHASER – Micro Jighead Series is developed to target small fish on light tackle. Specifically designed for rock fishing, it includes three models featuring different head shapes for three different swimming patterns: Harpax Darting LRF, Prisma Darting LRF and Punch LRF. Not only is this series designed to cater to SW inshore rock fishing – featuring a bright tin coating to avoid corrosion - but it can find application also in light FW fishing for perch, zander, trout, chub and small carp.

PRISMA DARTING LRF

Silent Chaser-Prisma Darting LRF features an aggressive darting action and performs at its best in slow to no current.

CIRCLE HOOKS

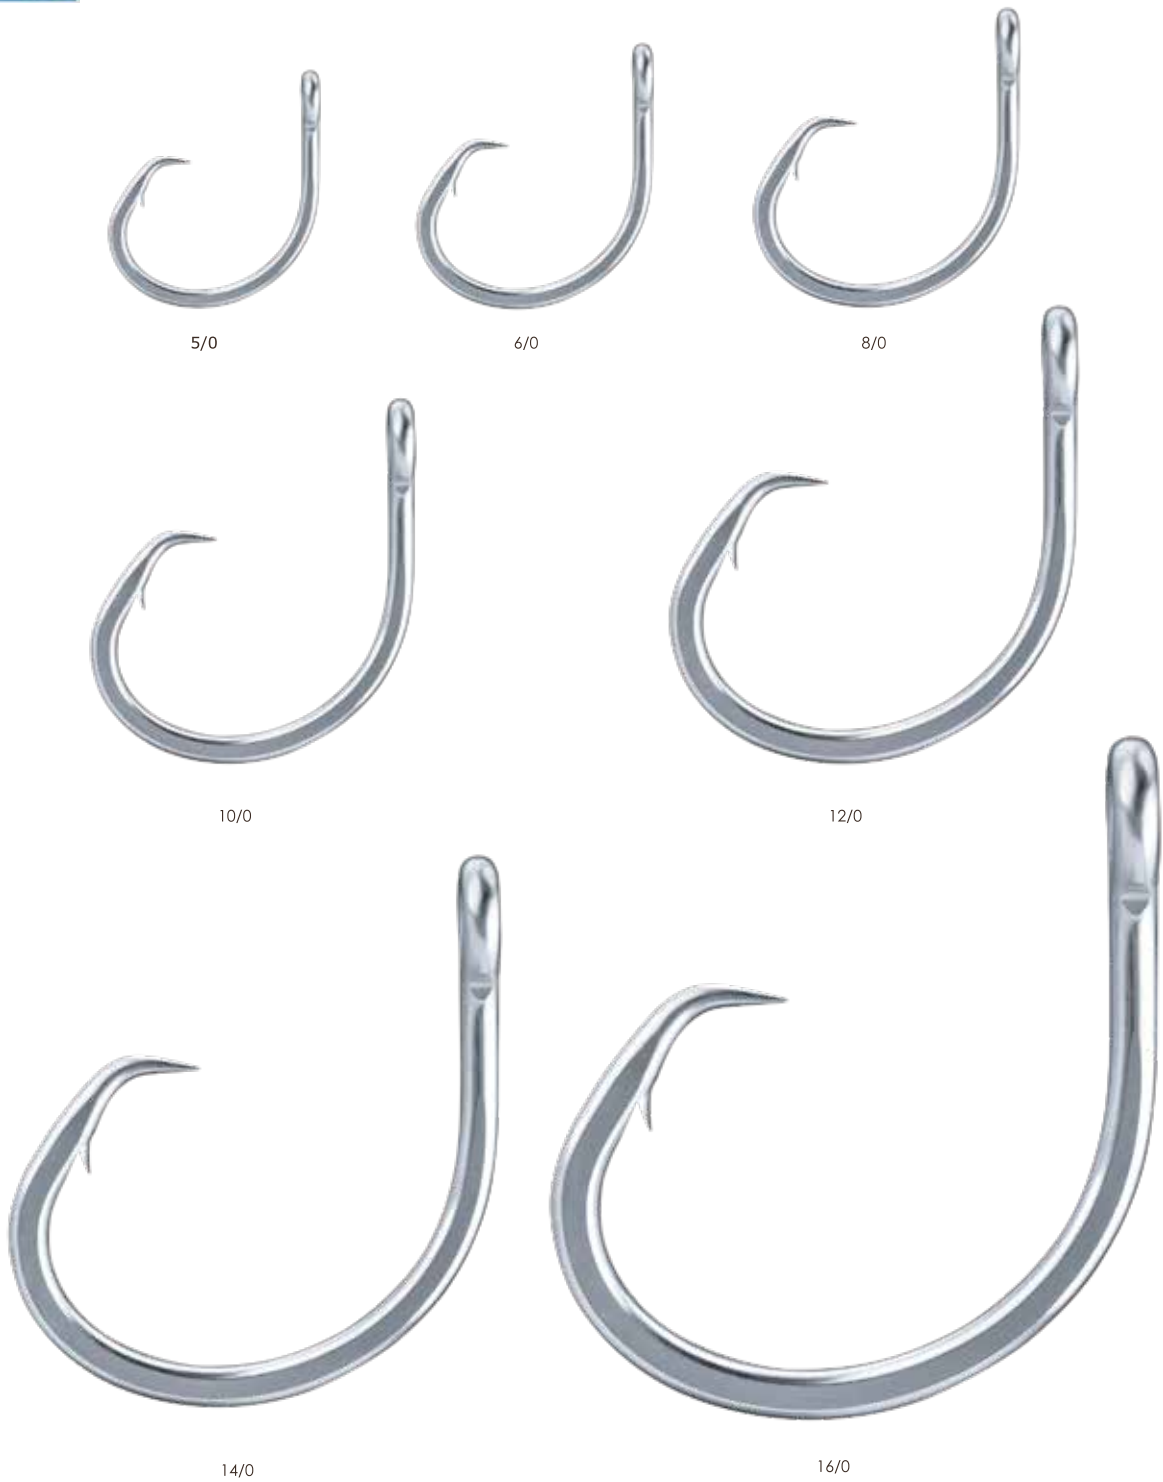

Designed with catch and release in mind, the lineup of BKK's circle hooks excel at providing a high hookup ratio while minimizing the risk of injury to the fish. With sizes ranging from #12 to 16/0, you can trust BKK to provide the ultimate stopping power to even the largest of fish.

MONSTER CIRCLE

BKK's Monster Circle hooks are specifically developed to target the strongest saltwater species. It features BKK's Ultra-antirust coating that ensures a superb saltwater corrosion performance and a super durable and sticky-sharp needle hook point for excellent penetration performance. Additionally, the inline hook point design ensures a jaw corner hook up, being for this reason ideal for C&R. These hooks are simply a must-have when targeting extremely big fish.

MONSTER CIRCLE
DRIFTING SPECIAL

BKK Monster Circle Drifting Special is specifically developed for drift fishing tackling massive saltwater species. The hook is designed with a straight eye and an in-line hook point that make it very versatile, as it can be used to tackle various kind of blue water species such as tuna, king fish and sharks. When drifting, the stainless-steel ball bearing swivels with ultra-smooth dual rotation absorb all torsional forces and avoid tangles. BKK's signature Hand Ground hook point delivers superb impaling power and minimizes piercing resistance, increasing the hook up ratio. It is the go-to hook when targeting some of the world's largest fish.

OFFSET HEAVY CIRCLE-SS

The BKK Offset Heavy Circle-SS is an extremely versatile hook well suited for a wide variety of freshwater and saltwater fishing applications with both live baits and chunk baits.

These Circle hooks feature BKK's Super Slide coating which reduces friction for easy point penetration by simply coming tight to the fish when it takes the bait. The coating also helps ease the sliding of live baits onto the hook to help prolong their liveliness.

In addition to the circle hook design, the offset hook point further enhances the hook up rate by maximizing the chances of fish's self-hookups.

OFFSET HEAVY CIRCLE-GLOW

The BKK Offset Heavy Circle-Glow is an extremely versatile hook developed to suit a wide variety of freshwater and saltwater fishing applications with both live baits and chunk baits, and specially eyeing at low light conditions like night fishing or deep dark waters.

The glow point on the shank adds attractiveness and visibility to the hook, triggering the fish to bite whilst maintaining the original sharpness of the point.

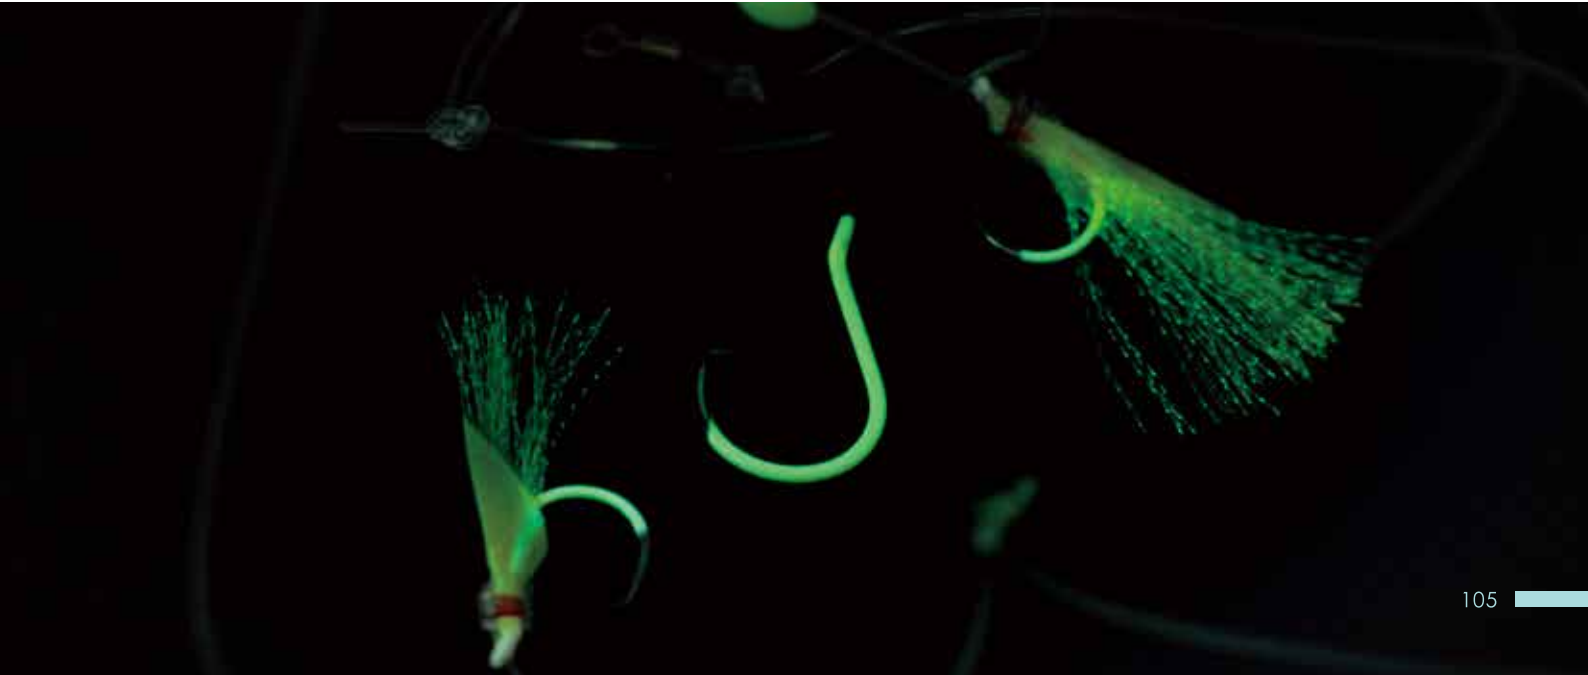

In addition to the circle hook design, the offset hook point further enhances the hook up rate by maximizing the chances of fish's self-hookups.

RINGED MUTSU CIRCLE HEAVY-SS

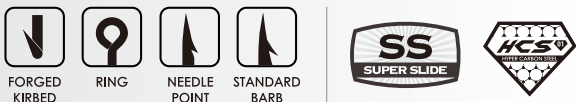

The BKK RINGED MUTSU CIRCLE HEAVY-SS is a stronger version of the MUTSU CIRCLE MEDIUM developed for heavier offshore applications with both live baits and chunk baits. It features a super sharp offset point which together with the SS coating delivers faster hookups and easier bait rigging. In addition, thanks to BKK's proprietary HCS (Hyper Carbon Steel), the hook structure is strong enough to hold big fish like blue and yellowfin tuna. The Additional solid ring allows the bait fish to swim livelier and naturally enticing more bites.

COMPETITION CIRCLE-SS

The BKK COMPETITION CIRCLE-SS is a light wire hook that features a wide gap and a SS (Super Slide) coating that enhances the penetration performance, easing the sliding of the bait onto the hook and delivering the best hooked-to-landed ratio. It is the perfect hook for a wide range of applications ranging from drifting with live bait to trolling for bill fish. In addition to the circle hook design, the inline point keeps the hook from catching the gut cavity or throat, making it ideal for catch-and-release and qualifying it as tournament approved.

RED CARLISLE BLOODWORM-R

The BKK Red Carlisle Bloodworm-R is designed to target various fish species both in fresh and saltwater. The extra-long shank on the one hand prevents the fish from chewing the line and on the other allows for an easier unhooking. The red plating boosts the natural presentation of the bait in the water by concealing the hook. Suitable baits can be worms, crustaceans, mussels and other natural baits.

OCTOPUS BEAK STRAIGHT EYE NEW

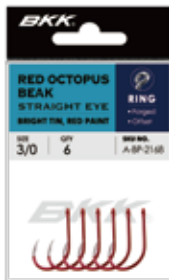

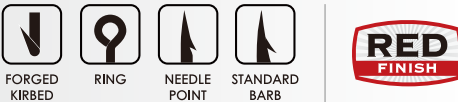

BKK Octopus Beak is one of the most popular bait fishing hooks for both freshwater and saltwater fishing, featuring an offset hook point (reversed) that provides an enhanced hook-up rate. Its wide gap design allows for the use of bigger and bulkier baits. The black nickel finish helps to maintain the hook's sharpness and provides excellent saltwater resistance. Last but not least, the needle hook point provides excellent penetration performance. Now available with a straight-eye design for alternative rigging options.

GANGED HOOKS-HD (PRE-MADE) NEW

The BKK Ganged Hooks are specifically developed for presenting strip bait or whole baits with the added advantage of multiple well exposed hook points, which results in a better hook up rate. Ganged hooks also lessen the chance of the fish's teeth coming into contact with the line thus reducing bite offs. Developed with penetration and strength at the forefront, the BKK series of gang hooks will help improve your fishing experience.

Flasher Rigs to step up your bait fishing game

The BKK Hyper Flash is specially designed to target bottom dwelling fish like Snapper, Tarakihi and Gurnard. Super sharp BKK hooks allow for an easy fit of squid strips, pilchard cubes or chunkier bait converting every bite into solid hook ups. It features glowing beads and shimmering fibres to enhance the attractiveness of the rig presentation and an innovative snap that accommodates sinkers of all sizes allowing for fast replacement. Additionally, a connection swivel is added at the top in order to absorb all torsional forces and avoid undesirable tangles. It comes wrapped in a handy re-usable foam to minimise tangles and make for easy storage of your rigs after use.

The stainless-steel snap at the bottom of the flasher rig is designed with a large gape to be able to accommodate many types of different leads according to the fishing conditions.

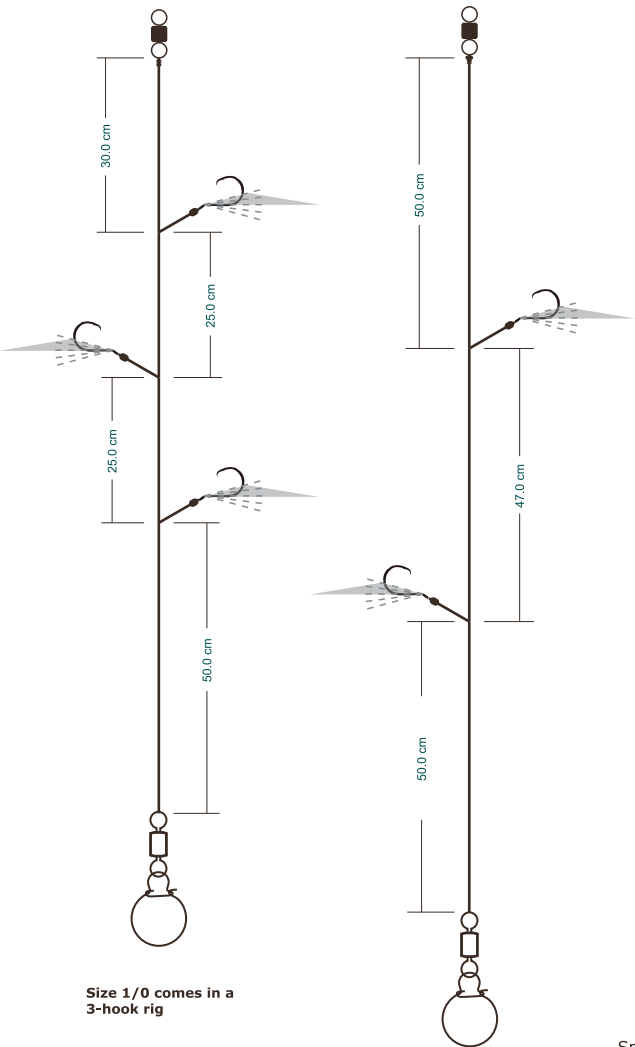

HYPER FLASH

Hyper Flash A1&A2
The series Hyper Flash A1 features BKK Octopus Beak hooks coated in Black Nickel. Each hook carries shimmering fibers to boost the presentation of the rig that come in four different colour combinations: yellow tang (chartreuse), smoking salmon (pink), red fang (red-orange), flying fish (blue-silver). Available tied in 60lb (3hooks) and 80lb (2 hooks) line.

Hyper Flash B1
The series Hyper Flash B1 features BKK Glow Heavy Circle. Each hook carries shimmering fibers to boost the presentation of the rig that come in four different colour combinations: yellow tang (chartreuse), smoking salmon (pink), red fang (red-orange), flying fish (blue-silver). Available tied in 60lb(3 hooks)and 80lb(2 hooks)line.

Hyper Flash B2
The series Hyper Flash B2 features BKK SS Heavy Circle. Each hook carries shimmering fibers to boost the presentation of the rig that come in four different colour combinations: yellow tang (chartreuse), smoking salmon (pink), red fang (red-orange), flying fish (blue-silver). Available tied in 60lb(3 hooks)and 80lb(2 hooks)line.

Size 1/0 comes in a 3-hook rig

Sizes 4/0, 6/0 and 8/0 come in a 2-hook rig

FEEDER AND CARP

From pole to feeder, method and carp fishing, this section includes hooks and rigs that are specifically designed for some of the most popular coarse fishing techniques, equipped with BKK's technologies.

CURVE EXTREME

The BKK Curve Extreme is a hook whose design draws inspiration from the award-winning Lone Diablo. It features a wide gape for an increased hooking potential and a perfectly curved design that evenly distributes the loads along the shank, maximising both strength and resilience. It can be used with both bottom and pop-up presentations.

WIDE GAPE

The BKK Wide Gape is an hybrid hook that inherits the finest parts of the best hooks available,a short flat-forged shank,the Hand Ground beaked point,and the super slick SS coating. These features combined together deliver the best hooked-to-landed ratio and set this hook to become a true classic.

A-BC-0332	4		
A-BC-0333	2		
A-BC-0334	1		

BEAK POINT

The BKK Beak Point is engineered for both bottom bait or pop-up presentations and is particularly useful when fishing over gravel as the in-turned point is far less likely to get damaged. The downturned eye boosts the hook's ability to flip, converting every bite into solid hookups.

CURVED SHANK

The BKK CURVED SHANK is an extremely versatile hook, suitable for all kinds of carp rigs and both bottom and pop-up presentations. Features include a forged shank, the super slick SS coating, and a long, straight, Hand Ground point. Its aggressive bend allows it to reach a remarkable hooking performance.

FT-1

The FT-1 (Feeder Tournament 1) is an all-rounder, and can be used for a variety of different styles of fishing – everything from waggler or feeder fishing with hair-rigged baits, through to pole fishing for big fish on heavy elastics. The wide gape ensures that as many bites as possible are converted into hooked fish, as does its beaked, ultra-sharp point. It is also the perfect choice to use when hair rigging baits. Hooks feature a SS coating that gives it a darker finish and makes the surface smoother to enhance penetration and the hook last longer.

FTB-1

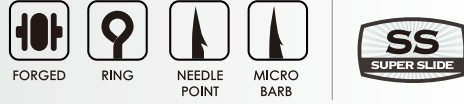

The FTB-1 (Feeder Tournament Barbless 1) is a strong all-round pattern that's suitable for most styles of angling, suitable from waggler fishing, through to heavy pole work and specialist feeder fishing. It features a super-wide gape and a beaked shape that helps convert solid hook holds into fish in the net. The SS coating gives it a darker fishing and makes the surface smoother to aid penetration.

SKU NO	Size	Qty	PKG
A-BD-0120	16	10	20
A-BD-0121	14	10	
A-BD-0122	12	10	

FT-2

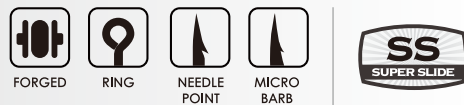

The FT-2 (Feeder Tournament 2) feature an out-turned eye, which ensures that the line exits the eye in a straight line, making for a better presentation and greater hooking potential. An extra-long, durable point and wide gape guarantee extremely secure hook ups, which will result in more fish in the net. The SS coating gives it a darker finish and makes the surface smoother to aid penetration.

Feeder And Carp

ACCESSORIES

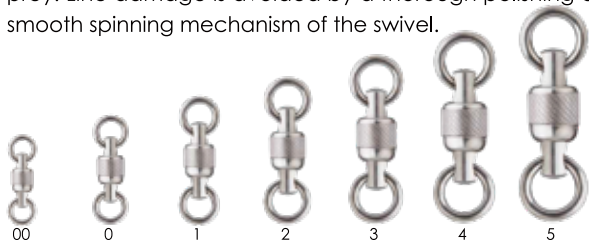

BKK's solid rings are unmatched in terms of strength and reliability, providing the utmost confidence in any fishing situation. From freshwater to saltwater swivels, BKK offers a smooth and seamless rotation, ensuring maximum performance. And our split rings are precisely designed for easy attachment and maximum strength, making them the ideal choice for any fishing enthusiast.

BB SWIVEL

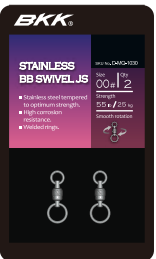

BKK Stainless BB Swivel are made in high quality stainless steel to resist rust and corrosion. Precise punching allows to shrink the wire section without affecting the strength and elasticity required to fight big prey. Line damage is avoided by a thorough polishing of all surfaces and torsions are prevented by the smooth spinning mechanism of the swivel.

BB SWIVEL JS

BKK Infinity Swivel JS is a different version of the Infinity Swivel designed to rig your jigs. It features all the characteristics of the original Infinity Sivel to resist corrosion, provide strength and durability and avoid all torsional forces. In addition,one of the rings is larger to allow for extra freedom of motion to both the assist hooks and the jig in your jigging presentation, thereby enhancing your hook-up rate.

TEASER BLADE

The BKK Teaser Blade WS1 is designed to boost your weedless presentation using the Titan Diver and the TitanDiver+. We chose a slimmer profile compared to most of the blades on the market to minimize the chance of snags, at the same time maintaining a smooth spinning action. Enticing flashes are boosted by the hammered finish of the blade's surface. The connection system lastly is super easy, allowing for a quick and easy replacement.

OCD-BOX A1

The BKK OCD Box is a handy case to store small tackle like hooks, jigheads, micro assist hooks, trebles, spoons and the like. The foam can accommodate your tackle and keep it in order when on the go. It is particularly handy for storing and organizing trout area spoons and other small lures, as not only it prevents tangling but also because it provides an instant and clear view over your tackle.

2-LOOP ASSIST CORD

The BKK 2-Loop Assist Cord is a simple yet very handy assist cord designed to attach your jigging hooks onto your jig with ease. It features two loops at both ends and shrink tubing to stiffen the middle section. It comes in different lengths to fit most jigs, providing different rigging options: the short ones are used for single-hook rigs and the long ones for double-hook rigs. Some of the sizes can be used to upgrade your jighead rig by connecting a single hook or a treble to the eyelet of the jighead (stinger).

RAIN JACKET

Built to keep you dry and comfortable in day long downpour, the BKK Rain Jacket is equipped with a long list of performance features to provide the best level of coverage from rough weather. Made using a durable three-layer construction that provides a 10k/10k waterproof/breathable rating, the BKK Rain Jacket features a YKK water-repellent heavy-duty center front zipper and internal cuffs that help prevent unwanted moisture from getting inside.

The hood is fully adjustable and features drain holes at the base to prevent water from pooling. The hood also neatly tucks away in collar when not in use.

Upping the ante on functionality, the BKK Rain Jacket boasts strategically placed water-tight dual chest pockets and zippered handwarmer pockets with adjustable waist cinch located inside.

Integrated with reflective logos for increased safety, the BKK Rain Jacket gives anglers the tools they need to stay focused on fishing in the worst conditions.

O³ SHIELD

The BKK O³ Shield fishing gaiter is specially developed to provide full protection of both face and neck when fishing under extremely hot sun. The OZONE SHIELD fabric technology undergoes a special UV blocking treatment that enhances the body's ability to maintain perspiration and provides ultimate UV protections by up to UPF (Ultraviolet Protection Factor) 50+ against excessive UV radiations that can harm your skin. This, combined with vent holes over the mouth and nostrils,prevents the heat of your breath from clamming up the inside of the mask, fogging your lenses. Besides, high stretchability along with an innovative design allow for complete freedom of motion and comfort.

HALF FINGER GLOVES NEW

The new BKK Half Finger Gloves are best for light casting applications. The premium fabric provides lightweight and moisture-wicking features to keep your hands cool and comfortable. The extended length is great for added wrist coverage, and the anti-slip synthetic leather palm provides durability and extra grip when setting the hook or fighting the fish. The UPF 50+ fabric gives ultimate UV protection from the blazing sun.

FULL FINGER GLOVES NEW

The new BKK Full Finger Gloves are feature-packed with innovations and functionalities for jigging and heavy saltwater casting applications. For improved dexterity, the gloves are constructed with stretch materials in multiple panels, especially on the sides of each finger, allowing you to perform without restrictions. The palms and the fingers are made of durable and comfortable microfiber fabric. The added silicone prints give you a superb grip, while the breathing holes provide excellent ventilation. A sweat wipe towel designed on the left glove is to help you stay focused on the task at hand. The extra layer of protection on the index fingers provides doubled wear resistance and durability while casting or jigging. The gloves are secured using a Velcro fastening system, giving maximum performance throughout your time on the water.

OPALA GLOVES

Tested in Kamchatka and on the Great Slave Lake in Canada, BKK Opala Neoprene Gloves are developed to fish comfortably during the cold season. The outer layer and the slim profile of the wrist prevent water from reaching the inside, while the inner neoprene layer keeps hands warm. Thumbs, index and middle fingers are only half-covered to allow sensitivity on the line and freedom of motion during line tying and rigging operations.
